

method™

Open Plan Recycling:

Open plan offices improve collaboration, innovation and corporate culture. Method Recycling addresses the needs of open

plan offices, offering flexible, visible bins promoting collective sustainability.

Be Proud of Your Bins

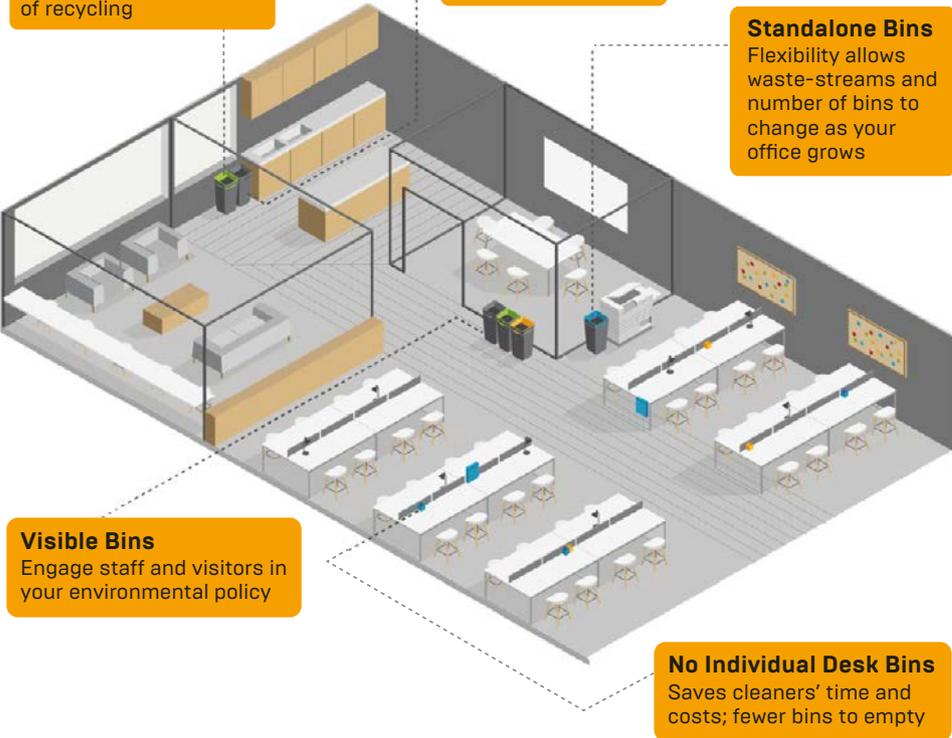

Create a new perception of recycling

Out in the Open

Avoid inflexible and expensive cabinetry

Standalone Bins

Flexibility allows waste-streams and number of bins to change as your office grows

Visible Bins

Engage staff and visitors in your environmental policy

No Individual Desk Bins

Saves cleaners' time and costs; fewer bins to empty

Product Features:

- Open or closed (touch to open) lids
- Modular design - choose 1-4 bins + graphics to suit your waste streams
- HD Connectors lock bins together to form one station
- Patented mechanism locks bin liner into place - no ugly bags
- New Zealand designed + made
- Help Guide online: methodrecycling.com/successful-office-recycling
- Easy to set up - view instruction video: vimeo.com/131854392

Accessories:

- Bin liners - methodrecycling.com/liners
- Desktop accessories - methodrecycling.com/precyclers

Best Design Awards
Winner 2015

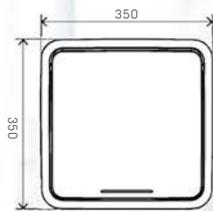

Specifications:

- 60L capacity per bin
- Made from 100% recyclable polypropylene
- CAD files available: methodrecycling.com.au/downloads
- NZ Patent: 620337
- NZ Reg Design: 418203
- AUS Reg Design: I1087/2014
- US Reg Design: D731,729 S

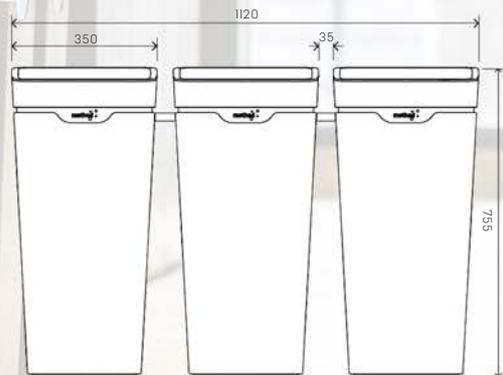

Dimensions:

Open lid

Touch to open lid

Measurements in mm
Open height of closed lid bin - 1010mm

Method - Beautiful Bins:

Method design and manufacture beautiful bins that make recycling a simple, stylish part of modern offices.

Co-founders India and Steven Korner observed the poor quality of recycling solutions available for offices. They saw sophisticated environments with recycling an afterthought – in conflict with the aesthetic created by architects.

With the increasing popularity of open plan offices and activity-based spaces they wanted a bin that was flexible and convenient, not hidden away in cupboards.

‘Design Thinking’ provided the framework for the research and design. Three years later the perfect office recycling bin was launched: a beautiful, functional and flexible solution, for recycling and rubbish.

Designed to simplify the process of recycling and engage users, reducing waste to landfill.

Office Recycling Station Graphics:

Available in open or touch to open (closed) lids except soft plastics and green recycling which are only available in open.
