

Experiences / Insights

Spring Cleaning brings clarity in the house! I L O V E to create and offer open spaces.

Creativity is human Nature. Yes also Animals and Plants create, yet not quite in the speed we do. Look around you. All the things we, as a species have created. Even all that seems to crush and hinders us. That is why I feel so passionate about intuitivity and embodiment. I believe strongly that this way contributes to a “healthier” development.

Last Friday I was at Elisabeth Handschins “Strandgutspiel”. A playful way to meet a Question in Nature and get in touch with my Intuition. With a lot of laughter and humor I met my question regarding my work. With the wild garlic I collected, I incorporated the experience during my dinner. The afternoon is still reverberating.

I also Visited Scuol (a Swiss Mountain Village), to look at a House nearby for one of my Ideas... but it was not the right place and house. So I enjoyed a great walk up in the mountains and a wonderful bath in the healing waters of the local Spring. Just Wonderful!!

Thank you so much for your interest!!
