

INTRODUCING THE
NOMAD

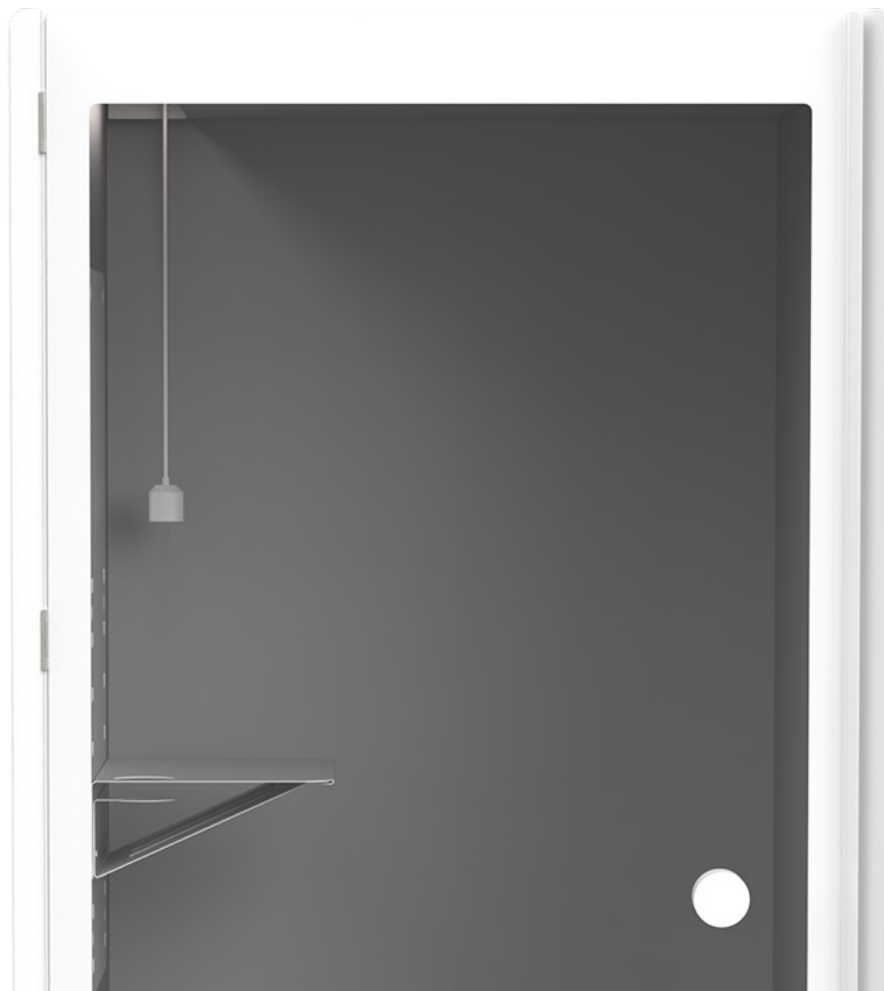

A quiet space for the open office

After years of struggling with noise in open offices and taking phone calls in the hallway, we decided to build a private space for the modern workplace.

Now, after more than a year in the making, we're proud to present the Nomad.
A soundproof and affordable booth making room for great calls and
a better office environment.

Our booth is developed with leading acoustic experts in Europe and our
soundproof materials are engineered from 60% recycled plastic bottles.

Great for both world and office environment.
