

# Let's Make It!

## Be a Leaf Peeper!

Are you a “leaf peeper”? A leaf peeper is someone who loves to see the beautiful fall leaf colors. As the summer ends and fall begins, the days shorten and the temperatures cool. This change causes the green leaves of many plants and trees to turn yellow, red, or orange. When the trees become colorful, it is time to start searching for the prettiest trees. It is time to be a “leaf peeper”. You will discover that most people are leaf peepers, and you probably are too!

Drawing and coloring fall leaves can be really fun. Follow the steps to draw your own leaves. After you have drawn and colored your leaves, cut them out and hang them or just create a picture by drawing several leaves on a piece of paper. Have fun leaf peeping and enjoying the fall activities!
