

Let's Make It!

Bubble Snakes!

In the winter, sometimes it is nice to do summery things to remember fun times had in the warmth of summer.

Here is a summer thing that you can try - it's called Bubble Snakes!

*You may want to try this in the bathtub or another place that is OK to get soapy.

First you will need to make up a batch of bubbles, and then the snake maker!

Here's what you'll need:

- 1 Gallon of Cold Water
- 1/2 Cup of Blue Original Dawn Soap (You can experiment with others. We just found this works best for some reason!)
- 1 TBS Glycerin (can be found at craft stores for soap making)
- A plastic cup, or a plastic water bottle
- A sock
- A rubber band

Directions:

1. Fill gallon jug 2/3 with cold water (cleaned out milk or juice jugs work great!)
2. Slowly add dish soap and glycerin to jug.
3. Top the jug off with more cold water.
4. Cap it and turn the jug over a couple of times to mix, don't shake. Your bubble solution is now ready.
5. Poke a hole in the bottom of the cup, then put the sock over the top of the cup, and secure it with a rubber band. OR, cut the bottom off of the water bottle, and put the sock over the bottom.
6. Pour some bubble solution into a shallow dish. Dip the sock in the bubble solution, and then blow through the hole in the bottom of the cup (or through the top of the bottle).
7. Make Bubble Snakes!
