

Coming to QLD, Australia!

Equine CranioSacral Workshops
is offering our
One Day Equine Assessment Workshop

Saturday March 21, 2015
Location: Gatton Indoor Arena
Gatton, QLD

When we hear terms like "cow hocked", "long backed", or "sickle hocked", many people think we are referring to the conformation of the horse. However, when we re-examine more closely, we see it has nothing to do with characteristics from breeding like hair color, eye set, nostril or ear size, and/or the density, length and size of the bone/skeletal structure. It is actually POSTURE and can change! This one day workshop teaches people how to identify equine biomechanical imbalances and conformational versus postural issues and ways to bring back balance back to your horse to keep them healthy and sound!

The workshop is taught by Maureen Rogers - founder and leading expert in the field of Equine CranioSacral Therapy and producer of the New DVD "Conformation vs Posture Myths Unveiled".

This is a unique opportunity for you to bring your horse for assessment and treatment by one of the world's leading Equine CranioSacral Therapists/Educators.

Workshop hours 9:30am – 5:30pm

Spaces are available for both spectators/auditors and people with horses.

Clinic cost for participants with horses is \$375.00 AUD (limit of 5 registrants with horses).

Cost for Spectators/Auditors \$85.00 AUD.

Registration is available at <https://www.equinecraniosacral.com/register.html>
