

# GDPR inventering och efterlevnad

## ContentMap functions

1. **GDPR Search & Report** - Sensitive data are shown as hits and charts in the map of the examined sources and a Report on GDPR threats in Sources are created.
2. **GDPR Search** - Sensitive data are shown as hits and charts in the map.
3. **Work Spaces** - Part of sources with sensitive data are delegated to coworkers by separate work areas in the map for analyzing and cleaning.
4. **GDPR Search** - Sensitive data are examined in the delegated Work Spaces.
5. **Organizing with Drag and Drop** - Sensitive data are deleted, masked, anonymized or removed.
6. **Status Report on GDPR compliance** - A new Status Report on Sensitive Data and GDPR threats are created.
7. **GDPR Guard** - The Guard function is continuously monitoring for new Sensitive Data.
