

Dorothy Fox Science Fair

March 11, 2020

Science Fair

Dorothy Fox Elementary
2623 NW Sierra Street
Camas, WA 98607

We need you to be a judge.

(Well, not really a judge because there is no winner, but we do need you to give students feedback on their science fair displays.)

Judges will receive a criteria sheet of what is expected to help you make comments.

The purpose of the science fair is to give students the opportunity to explore a question of interest in a systematic, scientific way. The ability to isolate an experimental variable and document the steps of the scientific method are part of the science learning standards for all students. Another benefit of such a project is that it requires students to integrate and apply the skills they have learned in language arts, math, and science. Furthermore, such projects allow students to learn about organizing their time and resources over a length of weeks to end with a final display product. For many, this will be their first attempt at thinking like a scientist. They benefit from the feedback of others; this is where we need you.

Yes, I am willing to help give feedback to some budding scientists at Dorothy Fox Elementary on 3/11/20 : Name: _____

Community Member Parent District Employee H.S. Student Other:

Available times: Please circle or check 1 or more shifts so we know when to expect you.
