Instructor Information:

Name: Martha A Burgess, M.S.

Phone/Voice Mail: 520-907-9471
E-mail: mburgess@tocc.edu
Office location: by arrangement
Office hours: M-W after class or by appointment

Course Description: This course covers basic principles of botany, plant ecology and the diversity of ways in which plants and the uses of plants have shaped cultural and historical developments of the Tohono O’odham. In this course, students will learn the fundamentals of plant classification and identification including the Tohono O’odham names of plants. Students will learn about the traditional uses of plants and their role in health and nutrition. They will learn about traditional plant harvesting methods as well as traditional and modern practices in plant cultivation. Students will also learn about the critical roles that plants play in the modern world and into a sustainable future.

Student Learning Outcomes (SLOs):

After completion of the course students will be able to ……

1. Describe the classification of life and the distinguishing characteristics of plants.

2. Explain fundamental aspects of plant anatomy and physiology including reproduction and key characteristics of flowers and fruits.

3. Identify plants to family using a dichotomous key and to species using identifying characteristics.

4. Know the scientific, common and Tohono O’odham names of culturally important Sonoran
Desert plants.

5. Describe the roles of major Sonoran Desert plant families used by the Tohono O’odham for food, health, and other uses.

7. Describe the historical and modern uses of plants including traditional harvesting methods, origins of agriculture and plant domestication, and traditional and modern agriculture.

8. Compare traditional and modern agricultural techniques.

9. Describe fundamental principles of human nutrition and nutrients supplied by plants.

10. Describe the ecological importance of plants in ecosystems such as food webs and global carbon balance.

11. Explain the critical roles that plants play in the modern world and into a sustainable future.

12. Identify possible careers in botany and biology.

Course Structure:

This course is an integrated lab/lecture course where the labs are integrated into the regular class periods. This course consists of 6 units. Each unit consists of PowerPoint lectures, assigned reading, films, in-class activities, reflective writing, discussions, laboratory project and several quizzes. The final project for the course will consist of collaborative class projects and an individual project and presentation in which students examine an ethnobotanical topic or issue including examining it from the Himdag perspective.

Course Assessment:

Course assessment consists of exams, quizzes, discussions, short written assignments, informal in-class assessments, laboratory reports and a collaborative service learning project which includes a paper and class presentation. Study guides will be available to help you prepare for exams. In accordance with my teaching philosophy in which I believe student learning occurs primarily through hands-on, real world application of course materials, exams usually comprise 50% or less of the final grade (although they are still an important aspect of course assessment and your grade). In order to facilitate on-going faculty-student feedback and provide formative assessment, many class projects are divided into smaller intermediate steps such as topic choice, project proposals, and rough drafts. Student-to-student assessments are also included in this course though peer review of group participation and written assignments. I welcome student feedback about the course anytime. I will also provide students an opportunity to give me feedback on their course experience through an anonymous mid-course and final course evaluation.

Himdag Cultural Component:
This course will focus on the core value of T-apedag (wellness) and include Tohono O’odham Niok (language) thus strengthening the Himdag and teaching science from a holistic and indigenous point of view. This course involves students in the study of plants which are an important part of Tohono O’odham life. Knowledge shared about the uses and benefits of Sonoran desert plants will be of great benefit to community members. Knowledge will be shared between the instructor, students, and a Tohono O'odham elder to address specific cultural content areas. In addition, the inclusion of O’odham plant names will help strengthen the Tohono O’odham Niok (language). This course will also enhance T-apedag (wellness), since it covers the importance of traditional plants in human nutrition and health.

Policies and expectations-

Course Policies Requirements: (1) Attend class regularly; (2) Complete in-class and out-of-class assignments and submit to the instructor on time; (3) Participate in all field trips; (4) Take all exams (5) Complete all class projects & presentations.

Attendance: You are expected to arrive to class on time and actively participate each class period. Quizzes and exams are given out at the beginning of class time. Field trips and class activities begin at the start of class and may be missed if you do not arrive to class on time. Because exams, labwork and/or other assignments potentially occur every class period, points potentially will be lost each class period missed. If you miss all or a portion of a class, then you are solely responsible for obtaining missed class material from fellow students. Complete attendance is mandatory during
student project presentations; otherwise presentation points will be forfeited. Four consecutive, unexcused absences may result in withdrawal. You may request to be excused from class for religious observances and practices, for illness, for travel, or for personal or family emergency. If you will be absent or have been absent, please notify the instructor as soon as possible.

Make-up policy: Missed exams can be made up within two days of the exam date. Late assignments that can be made up will be accepted but will be penalized 25%. Laboratories cannot be made up. At the instructor’s discretion, extra credit opportunities and optional activities may be provided.

Academic Integrity: Violations of scholastic ethics are considered serious offenses by Tohono O’odham Community College, the Student Services Department, by fellow students, and by your instructor. Students may consult the TOCC Student Handbook sections on student code of conduct, on scholastic ethics and on the grade appeal procedure. Copies are available at Tohono O’odham Community College.

All work done for this class must be your own. While you may discuss assignments with other class members, the final written project must clearly be your own. You may use work from books and other materials if it is properly cited. Copying from a book without proper reference or from a person under any circumstances will result in an “F” for the assignment, and at the instructor’s discretion, possibly an “F” for the course.

ADA Compliance:
Tohono O’odham Community College strives to comply with the provisions of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act. If you have a learning problem, physical disability, or medical illness that requires you to have any special arrangements, please inform your instructor at the beginning of the semester so your academic performance will not suffer because of the disability or handicap.

Classroom Behavior:
- Because of insurance limitations, non-registered visitors are not allowed at class sessions or on field trips.
- Possession of drugs, alcohol or firearms on college property is illegal.
- Food and beverages are allowed in classrooms.
- Pets, telephones, pagers and other electronic devices that distract students are not allowed in classrooms. Telephones, texts, and communication devices shall be off at all times during class to show and practice respect to fellow learners and instructors, unless as part of a collaborative class project.
- Students creating disturbances that interfere with the conduct of the class or the learning of others will be asked to leave.

Course Feedback:
All assignments, written papers and quizzes will be graded and returned to the students one week after the assignment is due. E-mail and phone messages will be returned within two days. A student or the instructor may request a student conference at any time during the semester. A mid-semester grade report will be provided to each student by March 15th.

Instructor Withdrawals:
Students who have missed four consecutive classes, not submitted any assignments nor taken any
quizzes by the 45th day census report, due on March 3rd, 2017, are assumed NOT to be participating in the class and will be withdrawn. Students may withdraw from class at any time during the first 2/3 of the semester without instructor permission and without incurring any grade penalty. Please be sure to withdraw yourself by April 3rd, 2017, if you do not expect to complete the class, otherwise you may receive an "F" grade.

Incomplete (I) grade:
"I" grades are not awarded automatically. The student must request an "I" from the instructor who will judge the student's ability to complete the course on his or her own. Generally the student must have completed over 80% of the course requirements with at least a "C" grade. An "I" requires a written contract between the student and the instructor listing work to be completed as well as how and when the work will be done. Please note: If the work is not completed within the contract period, the "I" grade automatically reverts to an "F." "I" grades will not be re-evaluated during the final two weeks of the semester when class activities are normally at their most intense.

Special Withdrawal (Y) grade:
The "Y" grade is an administrative withdrawal given at the instructor’s option when no other grade is deemed appropriate. Your instructor must file a form stating the specific rationale for awarding this grade. "Y" grades are discouraged since they often affect students negatively. Your instructor will not award a "Y" grade without a strong reason.

Final Grades: Students will receive a grade transcript from the college mailed to the address given with registration materials at the end of the semester when all grades have been recorded.

SPECIAL NOTE TO STUDENT:
For privacy and security reasons, instructors are advised NOT to give grades over the telephone. Grades will only be emailed with written permission from the student.

Your instructor will make every attempt to follow the above procedures and schedules, but they may be changed in the event of extenuating circumstances.

Students submitting assignments through the mail or by email are advised to make copies for their own protection.

If you move during the semester, please file a change of address form with the Student Services Office, and inform your instructor.

GOOD LUCK!
Course Outline (see schedule for specific dates):

I. Principles of Botany
   A. The plant body
   B. Plant reproduction
   C. Plant physiology
II. Plant Classification
   A. Characteristics and classification of lifeforms
   B. Major plant families of the Sonoran Desert region
   C. Plant taxonomic keys
   D. Identification of culturally important plants to the Tohono O’odham
III. Historical perspectives
   A. Harvesting and preparation of Sonoran desert plants by the Tohono O’odham
   B. Agriculture
      a. Origins of agriculture and plant domestication
      b. Traditional Tohono O’odham agricultural methods
      c. Modern agricultural methods
         1. Selective breeding
         2. Green revolution
         3. Agricultural biotechnology and genetic engineering
IV. Tohono O’odham Uses of Plants
   A. Introduction to Ethnobotany
   B. Plants as food
      1. Human nutrition
      2. Nutritional content of traditional plants
      3. Crop plants
      4. Sustainability
   C. Plants as medicine
      1. Role of traditional foods in prevention of diabetes
      2. Medicinal uses of plants
   D. Other uses of plants
      1. Fiber
      2. Building materials
      3. Other uses
V. Plant ecology
   A. Cycling of matter and energy in ecosystems
      a. Primary productivity
      b. Food chains and food webs
   B. Role of plants in global carbon cycle and global warming
VI. Careers in Botany
**DISCLAIMER:** This syllabus is designed to evolve and change throughout the semester based on class progress and interests. You will be notified of any changes as they occur.

Tohono O’odham Community College

Acknowledgment of Receipt of Syllabus

Please read, fill out, and sign and return the following acknowledgment to me at the first class session, or by scan and email before January 18 if you cannot attend the first class:

Martha Burgess
Tohono O’odham Community College
P.O. Box 3129
Sells, AZ  85634

☐ I have received my Bio 208N 2017 syllabus (which includes text, course objectives, policies, requirements and schedule) and have read and understood all the enclosed materials. I acknowledge that I will stay up to date receiving class communications via email.

☐ I have no objection to receiving an occasional call from the instructor at the number given with my registration materials.

☐ I prefer that the instructor not call or contact me by phone anytime during the semester.

My reason(s) for taking this course in Tohono O’odham Ethnobotany:
________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

My background in the areas of botany, plant studies, or ethnobotany includes:
________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

☐ I would like to be contacted by the instructor regarding the following personal concerns:
________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________
