

Bruce Lamb Grandkids are Priceless 22nd October 2019

Hi Bruce,

I've attached the (US) CDC vaccine ingredients. What happens over there, comes here due to financial drivers. Perhaps your daughter might study vaccine ingredients, then ask her nurse / GP: "so can you tell me what's in a vaccine?". 2) "would Mary Berry get jailed if she put these in a cup cake"? Worse still, as injected ingredients don't get excreted (unlike ingested foods, naturally *via the mouth to anus open circuit*). The immune system doesn't vomit, but self attacks via vaccine triggered mass (Generation V) autoimmunity. Sadly.

First up SV40 (Simian monkey Virus) in 94 million Americans via cancer causing polio vaccine there's also: mouse DNA, bovine serum, red/green monkey cells, pig gelatine, **plus there's:**

1. Formaldehyde = preservative, used to attenuate cells, that then wake up in the body.
2. Polysorbate 80 = patented to cause dog infertility
3. Triton 100 = a cleaning agent
4. e-coli = that's found in 'bad / contaminated foods'
5. Aluminium adjuvants = 3+ valency metal, NEVER tested to be safe: 90 year experiment.
6. Thimerosal = 49% ethyl mercury the 2nd most poisonous material on earth...
7. Borax = patented to kill cockroaches, and they REALLY take some killing!
8. Squalene = toxic, and a major component of anthrax vaccine causing 'Gulf War Syndrome'
9. MRC-5 = double diploid cells, from a 1966 baby, passaged through many media ever since
10. WI-38 = 38th aborted baby (WI = Wistar Institute) the first 37 dead babies didn't 'work'...

Be Well,

Courtenay

22nd October 2019.
