# Why HPV Vaccines

- 1) It has harmed girls I love.
- 2) The vaccine flagged with a 'black warning', for 'harms concern'
- 3) Japan stopped her trials six years ago due to extensive harms
- 4) The vaccine has never been tested for safety
- 5) Cervical cancer is rising in girls 20-24 in countries most vaccinated

## **Jury decision sought:**

- 1) Criminal coercion and Fraud**
- 2) Abuse of position, and abuse of statutory legislation**
- 3) Failing to comply with Common Law Court**
- 4) Breaking the 1948 UN Human Rights Act**
- 5) Breaking the 1947 Nuremberg Code**

## **Affidavits received for today, & for Vaccine History**

**Prof Chris Exley (x2), Amanda Dew, Dr Gayle Delong,  
Kathleen Berrett, Mary Holland, Tony Wild, Dr Loretta  
Bolgan, Emily Tarsell (x2)**

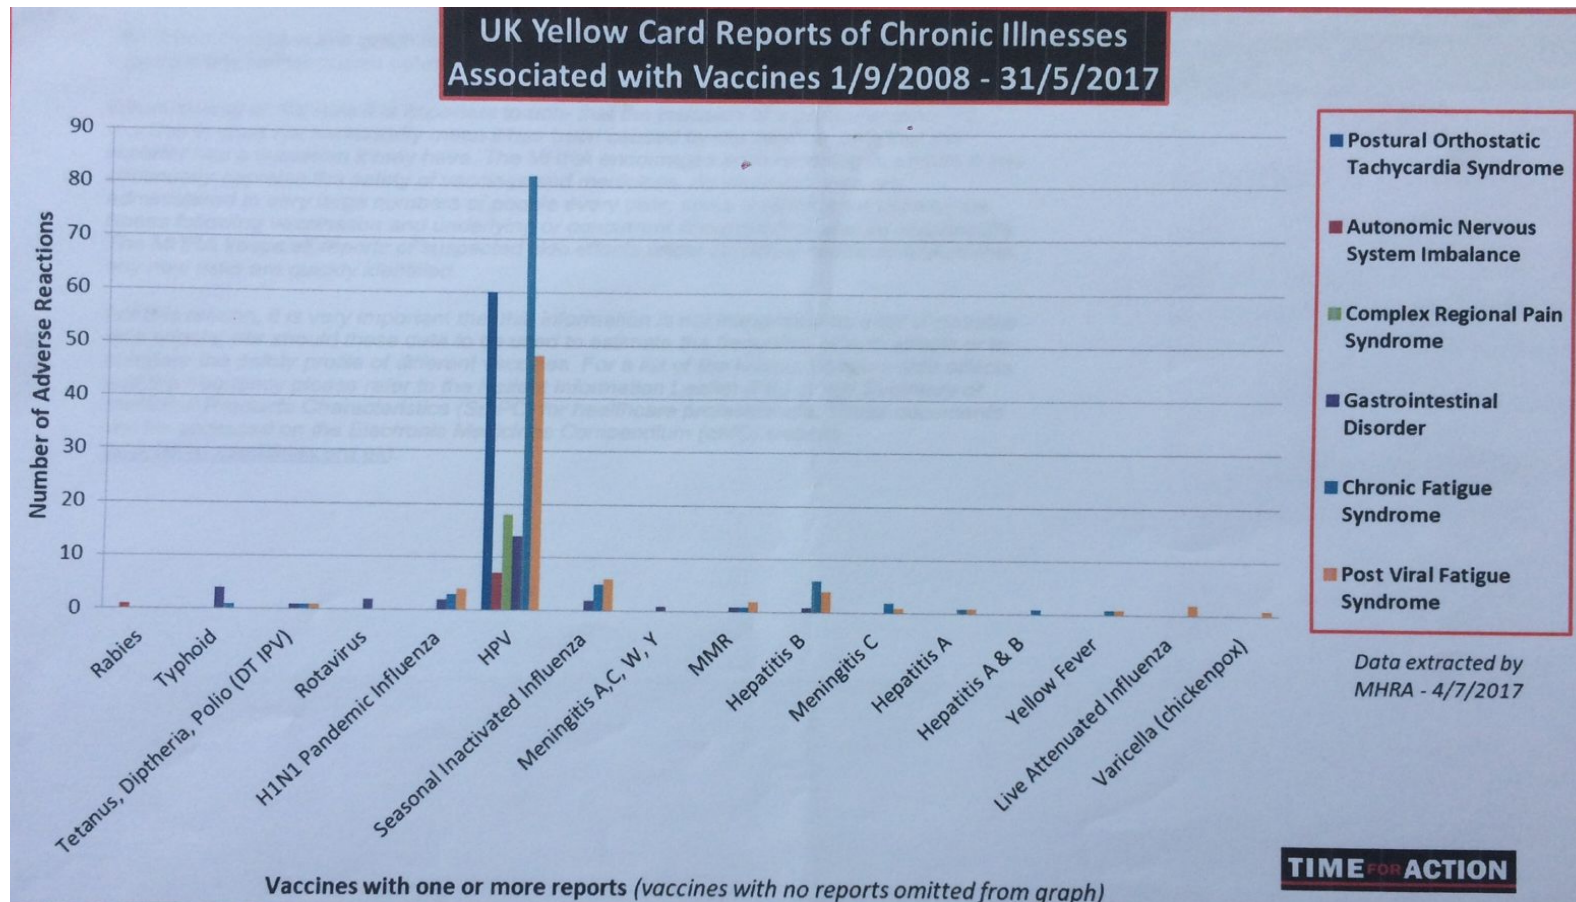

## **Harms post HPV vaccination**

**Cancer, chronic fatigue, cardiac disorders, endocrine disorders, gastro-intestinal disorders, diarrhoea, pancreatitis, liver problems, immune function disorders, period dysregulation leading to infertility, psychiatric problems.**

# **Why HPV Vaccines**

- 1. Causes mass, global, infertility? Period dysregulation comes first**
- 2. Over 500 deaths, and hundreds of thousands of injured girls**
- 3. Death by the vaccine has already been 'vaccine court' compensated**
- 4. 1 in 43 girls with serious adverse events, for a 1 in 15,000 disease**

# Why HPV Vaccines???

1. Never proven to prevent a single case of cervical cancer
2. The most serious & numerous reported harms of any vaccine
3. Fraudulent trials, which used less toxic ingredients to 'pass' testing
4. Corvelva lab tests: Contaminants - Mouse DNA, banned amphetamine
5. Cervical cancer is the 20<sup>th</sup> least 'common' female cancer (refer Dr Richard Halvorsen's book: Vaccines a Parent's Guide)

## Injected vs ingested toxins

**Ingested** food goes to the stomach, is digested and the components are then transported to where they are needed in the body. The gut barrier prevents unwanted substances from entering the bloodstream.

**Injected** proteins, which would not normally be present in the blood, cross the blood brain barrier and can contribute to allergies. Injected toxins accumulate in the body over time. See Miktus study 2011.

# **Medics resist open HPV vaccines debate**

**Isle of Man debate deniers: DHSC, Public Health, GP's, Consultants.**

**“It's career suicide to raise a vaccine adverse effect. Not 1 in 100 vaccine harms are officially reported” (see Harvard Pilgrim study)**

**Manx Consultant: “Can we just attend but not speak, nor be filmed”.**

**UK HPV vaccine harms are replicated around the world. Major harms groups forming, so far, in:**

**England, Isle of Man, Ireland, USA, Sweden, Spain,  
France, Australia, Denmark, Canada, Japan, Italy,  
Mexico, Columbia, Israel, Netherlands...**

**NO one has EVER safety tested the 500% increase in vaccine schedule load since the 1980's**

## Oxford Vaccine Group - University of Oxford:

*Babies' immune systems are working all the time to protect them against bacteria and viruses in the environment. Vaccines represent a very small challenge to the immune system when compared to this'.*

*But what about the injected metals, calf serum, animal cells, aborted human tissue, formaldehyde, squalene, and other toxins?*

**Dr Johan Misliwetz, Vienna Pathologist, examined HPV vaccine deaths “*I was told to stop talking about HPV vaccination deaths - I’ve done thousands of autopsies, but I never experienced anything like this*”. (see film: Sacrificial Virgins Part 1). Dr Misliwetz took early retirement...**

**Dr Sin Hang Lee - Pathologist (studied HPV vaccine caused deaths)  
Scottish Parliament Presentation in Oct’ 2015 “PAP smearing is far more effective - *HPV vaccination is a 30 year experiment*”.**

## **Let the experts speak**

**Question: Why have we seen NO Fall in Cervical Cancer rates?**

**Answer from a UK (university) HPV 'expert': "we will any day now"...**

**UK National Immunologist "I wouldn't give my daughter Gardasil because of the aluminium adjuvant". (Gardasil '9' has the 2x aluminium adjuvant load of Gardasil 4).**

## **Gardasil 9: Sons and Daughters - Warning Labels**

**Gardasil 9 is a black triangle product. It IS still under extra scrutiny for post marketing side effects. Requiring extra scrutiny...**

**GARDASIL is being promoted to protect against Head, Neck and throat cancers. These are OFF LABEL RECOMMENDATIONS. The manufacturer does not make these claims, refer to PIL (Patient Information Leaflet)**

## **Trials harms cut off versus efficacy timing clinical trials**

**No (true) placebo: aluminium versus aluminium, *true* harms are hidden**

**Trial harms only noted for 15 days, yet for a four decade 'active' vaccine**

**NEVER proven to prevent cancer. Only healthy trialists, others excluded.**

## **An upwards only, official vaccine schedule**

**270 vaccines coming along in the pipeline, begging to be 'mandated'....**

**1960's vaccines: 5 doses: In the US now it's: 72 doses between birth & 18 years old (roll up & get your annual flu shot - most compensated of all).**

***Half the 'development spend' is on marketing (not research).***

## **Follow the Money**

**Vaccine market, has expanded 13 fold \$\$\$ / £££ in 30 years**

**Since 1985 manufacturers are '*immune*' from Prosecution...**

**US Vaccine compensation fund has paid out \$4 billion, since 1986 through their private court but 3 year statute of time limit**

**\$65 million paid in HPV vaccine harms. Boys will increase that.**

# **FDA & HPV: Regulatory Capture**

**FDA website in 2003: 'Infections caused by HPV (human papilloma virus) actually cause no danger in healthy women and are usually short lived'. Disease mongering in 2019?**

***It's tempting for some \$2 billion in sales - HPV vaccine: \$4 / dose to make, but sells for \$90/\$120: two doses 'needed'...***

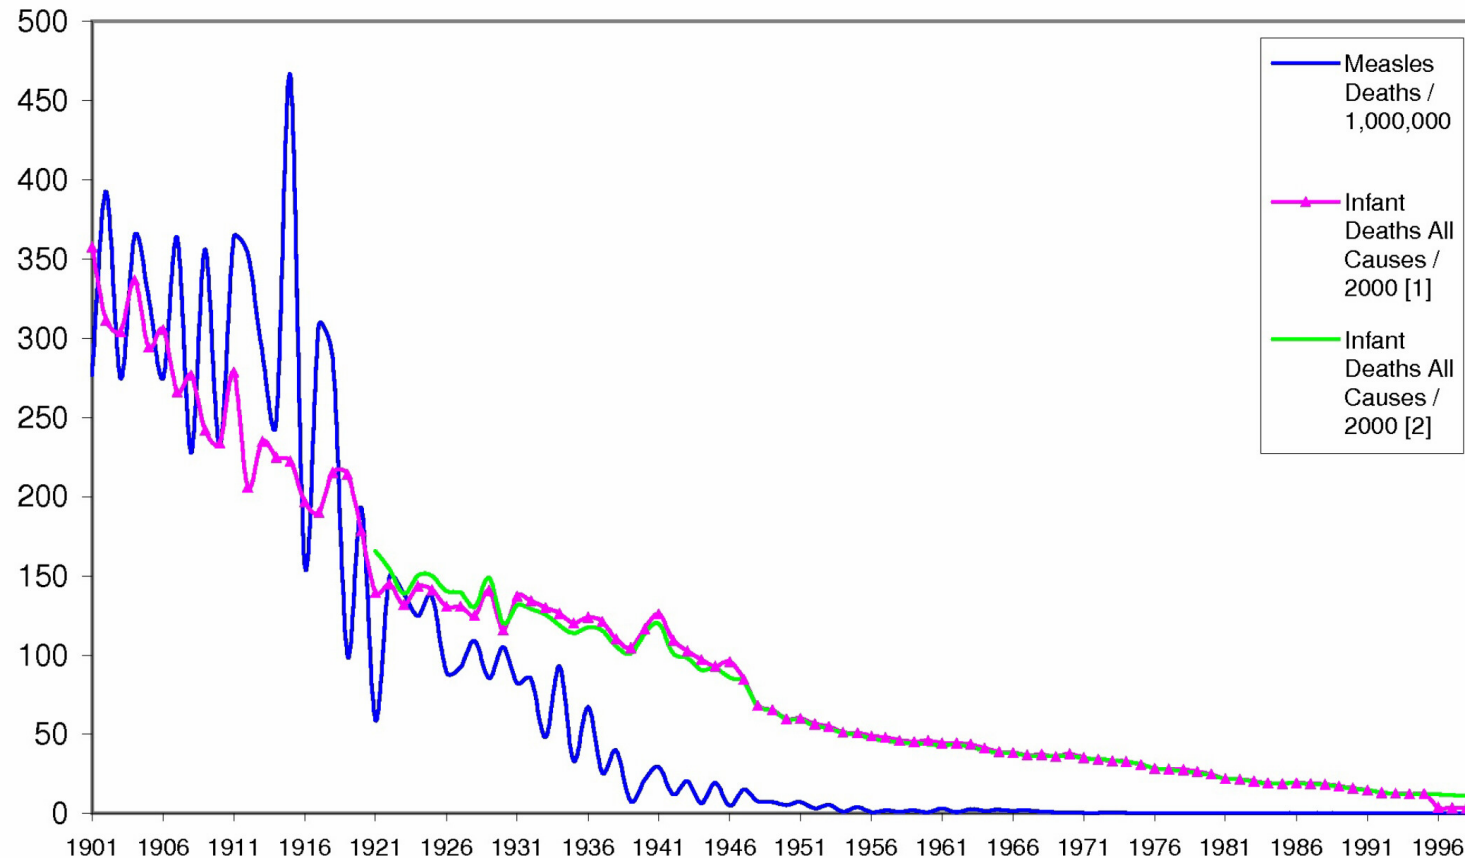

# CDC - Regulatory Capture

In 2004 Dr Bill Thompson, Senior Research Scientist showed the MMR vaccines caused 3.4 x autism increase in boys. *The Verstraeten Study: 'couldn't make that connection go away'*

Vaccinated versus unvaccinated, there is only The Anthony Mawson study: the CDC said to “retract it or else it would harm Public Health”. So, it was ‘retracted’... BUT view IT here:

MMR was the first **TRIPLE**, live virus vaccine. The first new UK NHS vaccine in 20 years. Dr Paul Thomas, Ohio Paediatrician starts MMR at age three: then: **autism goes away**. Dr Richard Halvorsen (Author Vaccines a Parent's Guide) offers individual M, M and R vaccines at his BabyJabs Clinics in UK: in Manchester and London. **But the NHS offer no single M, M, or R vaccine options. Compare the outcomes?**

**No mention of: risks versus benefit, the NNT (Number Needed to Treat), use of a comparator (not inert placebo), that the trial never showed the vaccine actually prevented cancer. Harms all ignored.**

## **In Summary**

- 1. No proof that it is needed, no proof that it works**
- 2. Global proof, it harm / kills - it may be causing cancer!**
- 3. Fraud, and criminal coercion at every level**
- 4. Lack of informed choice, parents are gagged**
- 5. Doctors fear for their jobs, so we lack open debate**
