Recommended platform specs: Windows XP, Pentium 3, 256MB ram
10GB HD, Internet browser access, 1024x768 screen resolution

Input device requirements: Keyboard or on-screen keyboard and a pointing device.

Game setup difficulty: Low

Genre: Adventure

General Description: An adventure puzzle game in the same vein as Cyan World's classic adventure game 'Myst'. This game is also designed using detailed 2d graphics to create a realistic virtual reality.

To play this kind of game individuals need to enjoy patiently solving abstract situation based puzzles. The puzzles are solved using observation of the players' surroundings, drawing upon the player's general knowledge and other intellectual skills such as language, and numeracy.

Being One also has links to video 'walkthroughs' to show the player how to solve puzzles they can't get past.
