Recommended platform specs: Windows XP, Pentium 3, 256MB ram  
10GB HD, Internet browser access, 640x480 screen resolution

Input device requirements: 1 button and a pointing device

Game setup difficulty: Low

Genre: Puzzle

General Description: In Rome Puzzle the player is faced with a board covered with symbols and must switch 2 pieces at a time to make a row of three or more. When this happens the row disappears and the other pieces fill their place. Each time you do this you win resources, gold, lumber, and food. When you have enough resources you will be able purchase buildings.

The aim of the game is to win enough resources to build a town.
