Flow Design Architects is a full service architectural studio established in 2017. We specialize in the design of architectural experiences. What this means is that we are not a business in a conventional way. We do not sell a product. We sell experiences and the means for our clients to achieve their dreams through the use of materials, colors, textures and form.

Our project sizes range from Extra Small, Small, Medium, Large & Extra Large. Everything we do is always unique and deeply rooted in our client's main goals and desires. We understand space, geometry and form but more importantly we understand our clients as individuals with needs and parameters. We work with each given parameter to achieve something cost effective and eye catching.

**Flow Design** / 50 Grove Street, Suite 226, Salem, MA 01970
