Instructor Information:

Name: Jorge Guarin
Phone/Voice Mail: (520) 383-0101
E-mail: jguarin@tocc.edu
Office location: Main Campus, Building A
Office hours: To Be Determined

Course Description:

Calculus for students majoring in business. Includes limits, continuity, differentiation and integration of algebraic functions

Course Objectives:

During this course students will
1. Evaluate limits of algebraic functions.
2. Determine continuity of a function and prove it by using its definition.
3. Evaluate derivatives of simple algebraic functions by using its definition.
4. Use techniques of differentiation on powers, sums, products, quotients, exponential, logarithmic, composite, and implicit functions.
5. Use the first and second derivatives to determine intervals for which a function is increasing or decreasing and concave up or down, points of inflection, and relative and absolute extrema; graph related functions.
6. Use tests of extrema to solve optimization problems.
7. Find the indefinite integral using integration techniques of power, constant, sum, substitution, logs, exponential, and integration by parts.
8. Use the fundamental Theorem of Calculus to evaluate definite integrals, and find the area between two curves.

Student Learning Outcomes (SLOs): After completion of the course students will be able to
- Perform optimization problems analysis with the use of graphing calculators.
- Create mathematical projects using PowerPoint.
- Employ technology to set up and solve real world situations using calculus.

Texts and Materials:

Evaluation and Grading & Assignments:

Attendance:
The attendance policy for this class is simple. You are all adults who have in some form paid for this class. If you do not wish to come to any session, you do not have to attend. However, you are still responsible for completing work on time. If you are late for class, enter quietly and sit down. You will not be allowed to make up any quiz you miss because of tardiness. In case of a valid emergency, contact the instructor using the information given on the first page. After filling out an absence form, the instructor will decide whether or not the work missed can be made up.

Academic Integrity: Violations of scholastic ethics are considered serious offenses by Tohono O’odham Community College, the Mathematics Department, and by your instructor. Students may consult the TOCC Student Handbook sections on student code of conduct, on scholastic ethics and on the grade appeal procedure.
[a] All homework can be done independently or with other students. The purpose of homework is to develop critical thinking skills and also to develop specific skills related to teaching mathematics by repeated practice of these skills. Without this practice most students find it impossible to perform well in this class. No collaboration is tolerated during exams in-class exams.
[b] Students are expected to abide by the Student Code of Conduct and the Scholastic Code of Conduct found in the Tohono O’odham Community College Student Handbook. Copies are available at the main student bookstore.

Course Feedback:
All materials submitted will be graded and returned the next class period after they are submitted.

Homework Policy:
Homework will be assigned each class period and is due at the beginning of the next class period before the quiz. The solutions to all odd-numbered problems in the text are given in the back of the textbook. Homework sets will contain both even and odd-numbered problems. Problem sets will be graded according to the attached rubric. An example of a 10-point assignment is also attached. Late homework will not be accepted unless the student has made an arrangement with the instructor before it is to be turned in.

Withdrawals:
Please be sure to withdraw yourself by October 26, 2016 if you do not expect to complete the class, otherwise you may receive an "F" grade.

Workload:
Students are expected to spend an average of 18 hours per week attending class sessions, doing assignments and preparing for exams. The standard Carnegie Unit of college credit assigns one credit hour for each 15 hours of class time and assumes that students spend two hours working outside the classroom for each hour of classroom instruction. For a three-credit semester course, this translates to an average of 12 hours spent outside of class weekly for 8 weeks.

Grading System/Policies:

<table>
<thead>
<tr>
<th>Your final grade will be calculated as follows:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 homework assignments 200 points</td>
</tr>
<tr>
<td>4 quizzes 200 points</td>
</tr>
<tr>
<td>4 tests 300 points</td>
</tr>
<tr>
<td>1 project 100 points</td>
</tr>
<tr>
<td>1 final exam 200 points</td>
</tr>
<tr>
<td>Total possible 1000 points</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grading Scale</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = 1000 - 900 points</td>
</tr>
<tr>
<td>B = 899 - 800 points</td>
</tr>
<tr>
<td>C = 799 - 700 points</td>
</tr>
<tr>
<td>D = 699 – 600 points</td>
</tr>
<tr>
<td>F = less than 600 points</td>
</tr>
</tbody>
</table>
Incomplete (I) grade:
To receive an “I” grade, you must have finished at least 1/2 of the course requirements and specifically request the grade. Please call before the last week of class to be sure that there is sufficient time to consider your request. An incomplete grade generally implies that a student has shown sufficient initiative to complete the course on his or her own. You will receive a copy of the standard “I” form filed with the grade. This form details specifically what must be done to complete the course. A student has one year to complete the required work, after which the grade automatically reverts to an “F.”

Make-up Assignments:
No make-up assignments will be given and no late assignments will be accepted unless the student has made arrangements with the instructor.

Extra Credit Opportunities: Do not ask for extra credit opportunities until you have completed all of the required assignments to date. The instructor will occasionally give extra credit homework, quiz, and exam questions that test critical thinking skills.

Final Grades: Students will receive a grade transcript from the college mailed to the address given with registration materials at the end of the semester when all grades have been recorded.

SPECIAL NOTE TO STUDENT: For privacy and security reasons, instructors are advised NOT to give grades over the telephone.

Course Outline:
I. Differentiation
   A. Limit definition of derivative
   B. Numerical differentiation
   C. Constant rule
   D. Power rule
   E. Constant multiple rule
   F. Sum and difference rule
   G. Product rule
   H. Quotient rule
   I. Derivative of $e^x$ and $\ln x$
   J. Chain rule (optional)
   K. Interpreting derivative as slope
   L. Finding equation for a tangent line (optional)
II. Optimization
   A. Demand
   B. Cost
   C. Revenue
   D. Profit
   E. Marginal cost
   F. Marginal revenue
   G. Marginal profit
   H. Maximizing profit and revenue
   I. Find break-even points given revenue and cost (optional)
   J. Find intervals of profit and loss (optional)
III. Integration
   A. Numerical integration (midpoint sums)
   B. Area under curve
   C. Definite and indefinite integration
   D. Fundamental Theorem of Calculus
   E. Integration formulas for polynomials, $e^x$, and $\ln x$
   F. Cumulative distribution function as an integral
   G. Consumer surplus
IV. Finite Random Variables
A. Probability mass function
B. Cumulative distribution function
C. Expected value (mean)
D. Variance and standard deviation
E. Binomial random variable

V. Continuous Random Variables
A. Probability density function
B. Cumulative distribution function
C. Integral definition of expected value
D. Integral definition of variance and standard deviation
E. Uniform random variable
F. Exponential random variable
G. Normal random variable
   1. Standard normal
   2. Standardizing normal random variables
   3. Using inverse normal to simulate normal random samples

VI. Random samples
A. Sample mean
B. Sample variance and standard deviation
C. Central Limit Theorem
D. Confidence intervals

VII. Computer skills
A. Graphing functions, including piecewise
B. Simulating normal random samples
C. Creating trend lines
D. Numerically solving equations (e.g., Excel’s solver function)
E. Constructing pdf histogram from a random sample

VIII. Class Presentations
A. Students will be required to present mathematics to the instructor and classmates
B. Students will use software to create slide presentations of their mathematical results

IX. Written Reports
A. Students will be required to write a mathematical report for their project
B. Mathematical ideas will be presented in written, graphic, and numeric format

DISCLAIMER: This syllabus is designed to evolve and change throughout the semester based on class progress and interests. You will be notified of any changes as they occur.

Acknowledgment of Receipt of Syllabus

Date: ______________

Please read, sign and return the following acknowledgment to me in class, or return to me at the following address:

Jorge Guarin
Tohono O’odham Community College
P.O. Box 3129
Sells, AZ  85634

☐ I have received my MAT 212 syllabus (including course objectives, policies, requirements and schedule) and have read and understood all the enclosed materials

☐ I have no objection to receiving an occasional call from the instructor at the number given with my registration materials.

☐ I prefer that the instructor not call or contact me by phone anytime during the semester.

My reason(s) for taking this course:

________________________________________________________________________

________________________________________________________________________

My background in this area includes:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

☐ I would like to be contacted by the instructor regarding the following concerns:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
