1. Shale Gas Solution in Tubular application
2. Well Integrity and HPHT Application
3. ISO13679 new version briefing

7-8 March 2013

Grand Ballroom 1 ,3rd Floor

Sheraton Changzhou Xinbei Hotel

NAM

WELCOME

Distinguished guests,

Thank you for joining us at Well Integrity & OCTG Solution for Special Conditions Summit - VAM® Premium Connection China Event.

Our goal is to show you that Vallourec is able to answer the most critical technical questions you could face in the OCTG domain, from the drilling to the line pipe, with a strong focus on the well tubing and casing.

As the worldwide leader of the premium OCTG connection, Vallourec will share with you concrete examples of the toughest situations we successfully addressed all around the world with our customers: Shale gas, Well integrity, High Pressure High Temperature,.....

We will present you the Vallourec solution has developed.

Three international experts will be our speakers sharing their knowledge and experience.

A plant tour of our Chinese facility will show you a very modern facility where we could thread all the gas tight connection you need.

I look forward to seeing you at Changzhou the 7 and 8th of March 2013.

A handwritten signature in black ink, appearing to read 'B Saintes', located below the main text.

Bruno Saintes
Vallourec OCTG Managing Director China

KEYNOTE SPEAKER

Colin Stuart

Managing and
Technical
Director

Colin Stuart has 33 years experience in upstream Oil & Gas as a Drilling and Petroleum Engineer, and has worked for several Majors in design, and operations management roles all over the world. He is active in SPE and the Institution of Mechanical Engineers (iMechE), being elected a Fellow in 1996.

In 2006, Colin Stuart formed Stuart Wright Pte Ltd, together with John Wright, a Singapore based consultancy specializing in Well Integrity Management and HPHT Well Design. Stuart Wright is now recognized as a leading HPHT Wells and Well Integrity services provider, by creating innovative solutions to Risk Assessment of Barrier Integrity in Wells; especially with Colin Stuart's appointment as an Expert Witness in major loss of Well Integrity event projects to both Australian and USA regulation authorities.

Jerry Buster

Director -
Technical Sales

Jerry Buster is a graduate of Prairie View A & M University with a BS Degree in Electrical Engineering. He began his career in 1978, working for Atlas Bradford, a manufacture of premium connections and upset tubing. After multiple buyouts and acquisitions he has remained with the premium connection and well design application up to the present date (34 years), where he continues to increase his knowledge of the Oil Industry. He is an active member in API, SPE, and IADC. He is currently Director Technical Sales with VAM USA representing the Premium Connection Product Line for the North American Market.

Through his career he has been involved in,

- Premium connections - design and qualification for down-hole tubular.
- Premium Connection product line validation.
- Failure analysis of pipe and connections.
- Running procedures for Premium Connection.
- String designs - pipe and connections for HPHT wells.

Laurent Dubedout

Marketing &
Development
Director

Laurent Dubedout is the Marketing and Development Director of Vallourec Oil and Gas division. He holds a MS degree in Mechanical and Petroleum engineering. He has spent more than 10 years with Vallourec in designing premium connection and supporting technically Oil and Gas companies in their premium connection and material selections.

CLEANWELL[®] DRY

READY TO RUN. 100% DRY.

CLEANWELL[®] DRY is the new dope free solution for VAM[®] premium connections. A completely dry coating directly applied in the mills on the surface of VAM threads and ready to use on the rig. A successful combination environmentally friendly, safer, cleaner and more efficient.

- Improves health, safety and working conditions.
- Reduces handling, providing cost savings.
- Improves well production and well integrity.
- Preserves the environment.

CLEANWELL[®] DRY completes the CLEANWELL[®] family.

www.vamservices.com

时刻使用，100% 清洁。

CLEANWELL[®] DRY 是VAM[®]特殊扣的免丝扣油技术。该技术可以在工厂将干燥的免丝扣油涂层直接涂敷于丝扣表面，并可直接运往现场使用。

- 改善健康、安全及工作条件。
- 减少操作程序，更加节约成本。
- 提高生产效率，改善产品完整性。
- 环保可靠。

CLEANWELL[®] DRY为CLEANWELL[®]大家庭中的一员。
