

ORCHESTRAL PLUG-INS

NEW ENTRY

NI Session Horns Pro | £249

Full Review: FM284

Session Horns Pro is an excellent way to get realistic sounding horns in many musical styles.

Spitfire Audio Hans Zimmer Percussion London | £399

Review FM277 Huge-sounding, versatile and packed with the 'HZ Factor', this is a truly epic percussion library.

Audionero LA Scoring Strings 2.5 | \$1,399

Review FM279 With its detailed control parameters it takes a while to learn but it's worth it. Great sounding strings.

EastWest Complete Composers Collection 2 Gold Edition | €725

Review FM274 A comprehensive range of inspiring and detailed sampled instruments that will broaden your creativity.

Spitfire Audio Sable Strings Vol 1 | £399

Review FM267 Sable Vol1 brings Spitfire Audio's ambitious orchestral library concept sharply into focus.

RHYTHMIC PLUG-INS

Sugar Bytes Egoist | \$99

Full Review: FM285

Egoist is a superb platform on which to kick musical ideas and grooves around, but it's lacking in the export department.

iZotope BreakTweaker | \$249

Review FM279 A great tool that makes programming and producing beats fun and delivers inspiring results.

Z3 Audiolabs Repeat-X | €40

An excellent sequencer-driven multi-effects processor that any adventurous producer could get plenty of mileage out of.

Illformed Glitch 2 | £40

A big step forward for the former king of glitch plug-ins, although the loss of some of v1's functionality irks a little. It is however, now available on Mac.

Vengeance Sound Glitch Bitch | £40

Not as feature-rich or powerful as some glitch plug-ins, but Glitch Bitch's workflow, envelopes and presets make it a winner.
