

SPRAY POWDER

Anti-Offset Powder (Coated)

Spray Powder was developed specifically for the offset printers. Smaller micron particles have been filtered out to further reduce airborne spray powder from floating onto delivery chains and equipment. Moisture resistant, easy to pour spray powder pouches. Allied starch based coated powders are well suited for use in a variety of print conditions including environments with extremely high temperatures that lack climate controls.

- Super fine filtered
- Less likely to block or clog pipes and nozzles
- Moisture resistant packaging
- Superior flow rate
- Minimal blanket piling
- Uniform grain shape
