

MICROBURST SYSTEMS KLEENER

Next Generation Step 1 & 2
The Only Fount System Kleener of its Kind! Better, Stronger, Faster.

Multi Detergent Powders, MICROBURST Detergent Bubbles and Calcium Removers.

[READ BELOW OR WATCH VIDEO FROM PRESSROOM](#)

Completely decontaminates fountain tanks, trays and recirculation lines in approximately 1 hour. While you prepare for the next press run, let Allied's Microburst System Kleener do the work.

- Effectively cleans throughout
- Hyper active, Microburst detergent bubbles clean, loosen and push contaminants out of return lines, pans and every where else.
- Penetrates, lifts and neutralizes calcium
- Simple flush out and refill application

Direction For Use:

STEP #1 - Pour all #1 contents directly into your contaminated fount recirculation system. Allow 25 minutes of recirculation for effective contaminate lifting & loosening. Do not flush.

STEP #2 - Pour all #2 contents directly into the fount recirculation system. Thousands of MICRO BURSTING detergent bubbles hyperactively clean, push and neutralize built up *calcium (from paper & ink) and contaminates throughout the system. AFTER 15 minutes of recirculation, completely drain the system. Perform a thorough water flush-out and refill with clean water.

**Note: Calcium & contaminates weaken and shorten the fountain solution duration/performance.*

NOTICE: PREPARE YOURSELF FOR WHAT YOU WILL SEE, IF YOUR SYSTEM HAS NOT BEEN CLEANED IN A LONG TIME.

After cleaning BE PREPARED for fewer issues and high consistent print quality.

(PATENT PENDING)

Specifications:

VOC content lb. / gallon	0
VOC content grams / liter	0
Flashpoint	None
Color	#1 White, #2 White
CA. Compliant	Yes

Available In:

Product Code	Unit	Case Qty.
818280LG SET	2 x 2 Kilo (4.5lbs)	4 sets
891280SM SET	2 x 300g (1.5lbs.)	6 sets
