

# ALCOMI 3368 NEWS FOUNT TE

Meets FOGRA Specs for Cold-Set Applications

(Manroland Web Sys - Koenig & Bauer)

Alcomi 3368 News Fount TE provides consistency in water speeds. Low solvent content assures reduced paper coating and ink breakdown, which aids in minimizing the build up of contaminants that will ultimately de-stabilize fountain solution and cause inconsistent image reproduction. Alcomi 3368 News Fount TE is formulated with a robust wetting / lubricating package, stabilized pH and desensitizers to provide ideal plate conditions to facilitate sharp open screens and reverses. In addition, printing blankets will remain cleaner without attracting heavy build up.

- Reduced or eliminated oxidation risk on plates
- Fast clean-ups of plates on start-ups and stop/starts
- Excellent protection of CtP plates
- Compatible with all Kodak plates
- Fogra, Blue Angel, and Nordic Swan compliant
- Easy installation and operating conditions
- Excellent dot fidelity with dense colors
- Low paper waste on start-ups and stops / starts
- Calcium Control, less build-up on blankets and rollers
- Low dosage required, depending on equipment type
- Dampening solution remaining clean in tank
- Dampening levels on press remaining low during print run

### Direction For Use:

Recommended dosage range 3 oz. to 5 oz. per gallon.  
Conductivity per ounce is 240 micromhos.

### Specifications:

VOC content lb. / gallon	1.2
VOC content grams / liter	144
Flashpoint	None
Color	Colorless
CA. Compliant	Yes

Fogra, Blue Angel and Nordic Swan Compliant  
NO.30535

Recommended dosage range 2.5% to 4%.  
Conductivity per 1% is 300 micromhos.

### Available In:

Product Code	Unit	Case Qty.
10651E	5 Gallons (18.9 ltr)	Each
10651G	55 Gallons (208 ltr)	Each
10651T	275 Gallons (1040 ltr)	Each

VOC COMPLIANT Air Quality Management District Compliant
