

UPC (UNIVERSAL) PLATE CLEANER

Plate Cleaner

UPC was developed as a plate cleaner / desensitizer, heavy duty scratch remover, and short-term storage gum that would perform on the many types of plates available. To ensure maximum performance, each raw material in the product has been thoroughly tested on the world's most widely used brand-name plates.

Using a blend of mild active solvents, UPC quickly lifts and removes inks. It contains a unique blend of acids to ensure fast and complete desensitization and dissolves and removes any calcium that has attached to the plate image. UPC contains materials that help attract ink to the image ensuring fast start-ups, even after storage. UPC's deep violet color helps the user clearly see where UPC has been applied during cleaning or when applying to plates for storage.

- Tested on the world's most widely used plates to ensure performance
- Protects against & removes calcium, preventing image blinding
- Unique product color helps user see and monitor application
- Contains materials that attract ink to plate image
- Use for short-term plate storage

Direction For Use:

Pour a liberal amount of UPC onto a clean sponge, shop towel or cotton wipe. Wipe over area to be treated using a side-to-side motion. To remove deep scratches, rub into scratch while making sure all ink has been removed. To store plates, clean the entire surface of the plate with a side-to-side motion. Make sure all ink is removed and product is smoothly applied.

Specifications:

VOC content lb. / gallon	4.0
VOC content grams / liter	481
Flashpoint	107°F
Color	Purple
CA. Compliant	No

Available In:

Product Code	Unit	Case Qty.
10008C	1 Quart (0.946 ltr)	6
