

FRESH START

STAY OPEN PRINTING INK SPRAY

Anti-Skinning Spray to Keep Ink from Drying on Rollers Overnight

Fresh Start will keep ink from drying out on rollers. The spray head allows for a fine even mist, coating the ink enough to keep it wet but not too much so as to break it down.

- Fine, even, mist in an aerosol can
- Stops ink from skinning overnight
- Reduces start-up waste
- Spray on blankets before start-up to reduce the tack for quick release
- For Webs, spray on the ink form during make ready, brings up colors
- Keeps ink open indefinitely without attacking and emulsification, allowing ink to lie down properly during start-up

Direction For Use:

To Keep Ink from Skinning:

Hold trigger spray bottle 6-10 inches away from ink on roller train, spray with a side-to-side motion until ink is coated.

Before Start-Up:

Spray a fine mist over the blanket surface. Wipe any excess off the blanket with a clean shop towel. This will ensure quick release from the blanket on start-up.

For Web Printers:

Spray a fine mist over the ink forms, this will bring up color and reduce waste during make-ready.

Specifications:

VOC content lb. / gallon	5.8
VOC content grams / liter	695
Flashpoint	-156°F
Color	Colorless
CA. Compliant	Yes
