

CA RINSE

Roller Residue Remover

CA Rinse is designed is formulated to remove oily residues left from using low voc/vegetable based blanket & roller wash. Most low VOC/vegetable based washes leave behind traces of oily residue that accumulates within the roller train when used frequently. To improve the poor printing that is caused by oily residues, Allied chemists have formulated CA Rinse to eliminate and prevent oily residue build up within the roller train.

- Removes any oily residues and/or contaminates left behind from all low voc washes
- Helps remove paper lint and promotes longer life to the rollers
- Periodically wipe blankets to remove unwanted residue for faster make ready
- Less than 100 grams per liter of VOC

Direction For Use:

After completing your normal roller wash application, apply a liberal amount of CA Rinse to the roller train as a final/thorough rinse. Allow CA Rinse to oscillate in the roller train to thoroughly remove any contaminates. Results are favorable when used as a second step in thoroughly removing low voc wash residues and contaminants from the roller train.

Suggestion:

Using CA Rinse daily will aid in preventing any residue or contaminant build up within the roller train.

Specifications:

VOC content lb. / gallon	0.5
VOC content grams / liter	62
Flashpoint	115°F
Color	Colorless
CA. Compliant	Yes

Available In:

Product Code	Unit	Case Qty.
10619C	1 Quart (0.946 ltr)	6
10619D	1 Gallon (3.785 ltr)	4
10619E	5 Gallons (18.9 ltr)	Each

VOC COMPLIANT Air Quality Management District Compliant
