

CRUD ROLLER PASTE

Clean, Revitalize, Unlock & Deglaze

CRUD Roller Paste is a paste cleaning product designed for use on rubber inking rollers. It is ideal for use where thorough removal of all pigment residues is required, such as critical color changes. Regular use of CRUD Roller Paste as part of a maintenance program will ensure that the rollers remain in optimum working condition.

- Deep cleans gently, contains no abrasives
- Reduces down time for wash-ups
- Provides faster start ups
- Reduces paper waste
- Easy to use
- Restores performance of the inking rollers

Direction For Use:

For use on Rollers:

Rinse off the ink rollers with usual solvent. Back off the clean-up blade or wash-up device. Using an ink knife, apply enough CRUD Roller Paste to thoroughly coat the entire roller train. Allow to work in for a few minutes, this permits the CRUD Roller Paste to penetrate and loosen glaze and ingrained pigments. Wash off the rollers with usual press wash.
