

PSG PLATE STORAGE GUM

Brown Asphaltum Plate Storage Gum

PSG Plate Storage Gum is a combination of solvents used to remove ink from the plate: micro-filtered gum arabic to protect and leave the non-image area of the plate water receptive and asphaltum to protect the image area and maintain ink receptivity. Asphaltum is one of the best ingredients available to guarantee that the image will stay ink receptive and protected.

The large amounts of gum arabic and asphaltum contained in the product assure a quick and clean start up after the plate is taken out of storage and washed off for use again.

- Assures fewer gum streaks during start up
- Stores plates for a few hours, few months, or a few years
- Reduces or eliminates image blinding
- Easy to apply; dries evenly
- Washes off plates quickly
- No need to buff

Direction For Use:

Clean plate using normal plate cleaner. Apply a liberal amount to a towel or sponge and wipe plate down, keeping the application as smooth and even as possible. Allow to dry. Plate is now protected for storage.

Specifications:

VOC content lb. / gallon	1.3
VOC content grams / liter	161
Flashpoint	145°F
Color	Brown
CA. Compliant	No

Available In:

Product Code	Unit	Case Qty.
