

# LIQUID SOLUTIONS

EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

Product ref. PR-15

Date: 15/03/19

## Inline Strainer

Robust strainers with superior wedge-wire elements in 316 stainless steel, giving strength in both forward and reverse directions and easier to clean than perforated or mesh types.

The filter bodies are available with different end connections and in three different configurations: the 90-deg and Y-type allowing removal of the strainer element without breaking pipe connections. There's a choice of removal rating, from 50 to 1000 micron.

### Example Prices

|                                                       |      |
|-------------------------------------------------------|------|
| In-line (straight) version                            | £325 |
| 90 degree version                                     | £360 |
| Y- type                                               | £395 |
| <i>(the above with 1.5-inch Triclamp connections)</i> |      |
| 1.5-inch RJT male connections                         | £40  |
| Extra strainer element                                | £215 |
