Carbonator / Wort aerator 'Carbogas'

Sintered stainless steel element within a TEE-piece: gas (typically oxygen or CO₂) fed in through a side-branch dissolves in liquid flowing around the element.

Standard device has a 150mm long sintered stainless steel element with 2 micron pore size Typically, sufficient for oxygenation of wort, or carbonation of beer or water to 2.5 volumes at 20 to 30 litres per minute.

Rate/efficiency of dissolution of gas depends on gas pressure, liquid temperature, flow rate and line pressure.

Standard inlet/outlet is 1.5-inch Triclamp. Adaptors available to RJT, DIN or other connections.

Gas connection is to a ¼-inch BSP ball valve.

Example prices:

Standard 'Carbogas' device	£170
Sightglass	£50
Sinter element ONLY	£95
RJT adaptors (Pair)	£45

Prices exclude delivery, commissioning and VAT
