MISSION IMMUNE SYSTEM AND INFECTIOUS DISEASES

Steps to complete the Web Quest

Benchmarks reviewed:

SC.6.L.14.5 Identify and investigate the general functions of the major systems of the human body (digestive, respiratory, circulatory, reproductive, excretory, immune, nervous, and musculoskeletal) and describe ways these systems interact with each other to maintain homeostasis.

SC.6.L.14.6 Compare and contrast types of infectious agents that may infect the human body, including viruses, bacteria, fungi, and parasites.

Directions – Glue on page 54 of your journal. As you complete each step place a check mark in the box next to it.
