

NB IoT Smart lock LDK400

Give your customers total control of any door with the new connected NB IoT Smart lock LDK400.

Property owners and managers can unlock their doors from their iOS and Android phones, and give keyless entry to workers, contractors, visitors, or anyone's phones for limited time periods in an instant with our digital key's management software and apps over the NB IoT network.

The NB IoT smart lock is easy to install - it takes less than 10 minutes. It is a strong stainless-steel weatherproof lock, which can be installed anywhere, indoors or outdoors.

**2 YEAR
WARRANTY**

Features

-  **Control and monitor your door from anywhere**
Lock and unlock your door, control keyless access, and keep track of who comes and goes, all from your smartphone
-  **Multiple property and multiple people management**
Create digital keys for groups like visitors, contractors, for any site anywhere in seconds from our software and apps.
-  **Next Level Security**
Our NB IoT smart locks are controlled by several layers of security implemented throughout, also taking advantage of mobile networks security
-  **Long battery life**
2 years battery life with 4 standard AA alkaline batteries (4 openings per day). Twice the battery life than Wi-Fi/BLE rival smart locks.
-  **Control access for anyone anytime**
Easily grant access for a few weeks, a few hours or a few minutes for anyone from our digital keys management software in a few clicks.
-  **No onsite network infrastructure**
All the equipment and infrastructure for our smart locks are inside the locks (e.g module(modems), SIMS) and in the mobile network.
-  **Many opening methods including keycards**
You can use our locks like a typical office/hotel keycard system. Program locks over the NB IoT network, and copy the unique ID (digital key) to a NFC keycard with our digital keys Android apps.
-  **Integrate to other smart devices and software**
Use our API's to integrate our digital keys management software/apps features including remote unlocking, programming digital keys over NB IoT network, live audits, cancel digital keys and device management to your software/devices
