

SMART Match

Fast-track your BD assessments

Due Diligence

Early Pipeline

Competitor Landscape

80,000+
data points

1,700
indications

1,000+
drugs

ACCESS INFINITY

Contextualised Data

The only database that scans all ema-approved products by therapy area, ma date, target population, hta outcomes, price, orphan drug status and many more parameters

Due Diligence

Apply multiple relevant criteria and search across all EMA products for benchmark products

Early Pipeline

Gain insights on drivers of value and innovation in any therapy area

Competitor Intelligence

Get to know currently approved products in any indication in just a few clicks

Disease Prevalence

US FROM 02 TO 83,685,182 TARGET POPULATION

2 83,685,182

Include not available options

Therapy Area

- Autoimmune disorders
- Blood disorders
- Bone disorders
- CNS
- CVD

Find answers to common market access queries

What is the distribution of orphan vs non-orphan products in a given therapy area?

What is the relationship between target population and price across different therapies?

What is the distribution of orphan vs non-orphan products in a given therapy area?

Other example questions you can answer...

What is the highest price a biologic achieved in a given indication?

How many products achieved ASMR IV and higher?

How many drugs launched with multiple indications as follow-on indications?

Empowered Communication

Choose your preferred graph type and select your x and y axis to clearly demonstrate key findings. Download and share with colleagues across the globe in minutes

What our users say

“ SMART Match is an incredibly powerful tool that we use to inform all of our early pipeline and BD assessments
Senior Director,
Early Pipeline Team ”

“ We love the graphical interface, particularly the charts. So easy to see trends across therapy areas and product classes!
VP, Market Access ”
