(Photoshop DDS + Google Sketchup 7 + Artlantis Randerer 3.0)
Plaza is a place of collecting and connecting. The plaza provides an open public space for events and ephemeral activities. It serves as a place for connection for the communities.

People are gathered into the public space creating all sorts of activities during the day and night becoming a center of community life.
The concept of "Organic Combination" defines individual public spaces into a combined Government office and its interactive outdoor spaces.

Sports field, pedestrian walkways and multi-functional open spaces intermingle organically and provide urban outdoor activity opportunities.
