Geopolitical, Goeconomic and Geodemocratic Alternatives to the Global
World Crisis

Mexico City and Toluca, March 19-21, 2015

Being the global crisis

The contradiction between growth of production and environmental restrictions

The contradiction between Overcrowding in Some regions and Low populated other

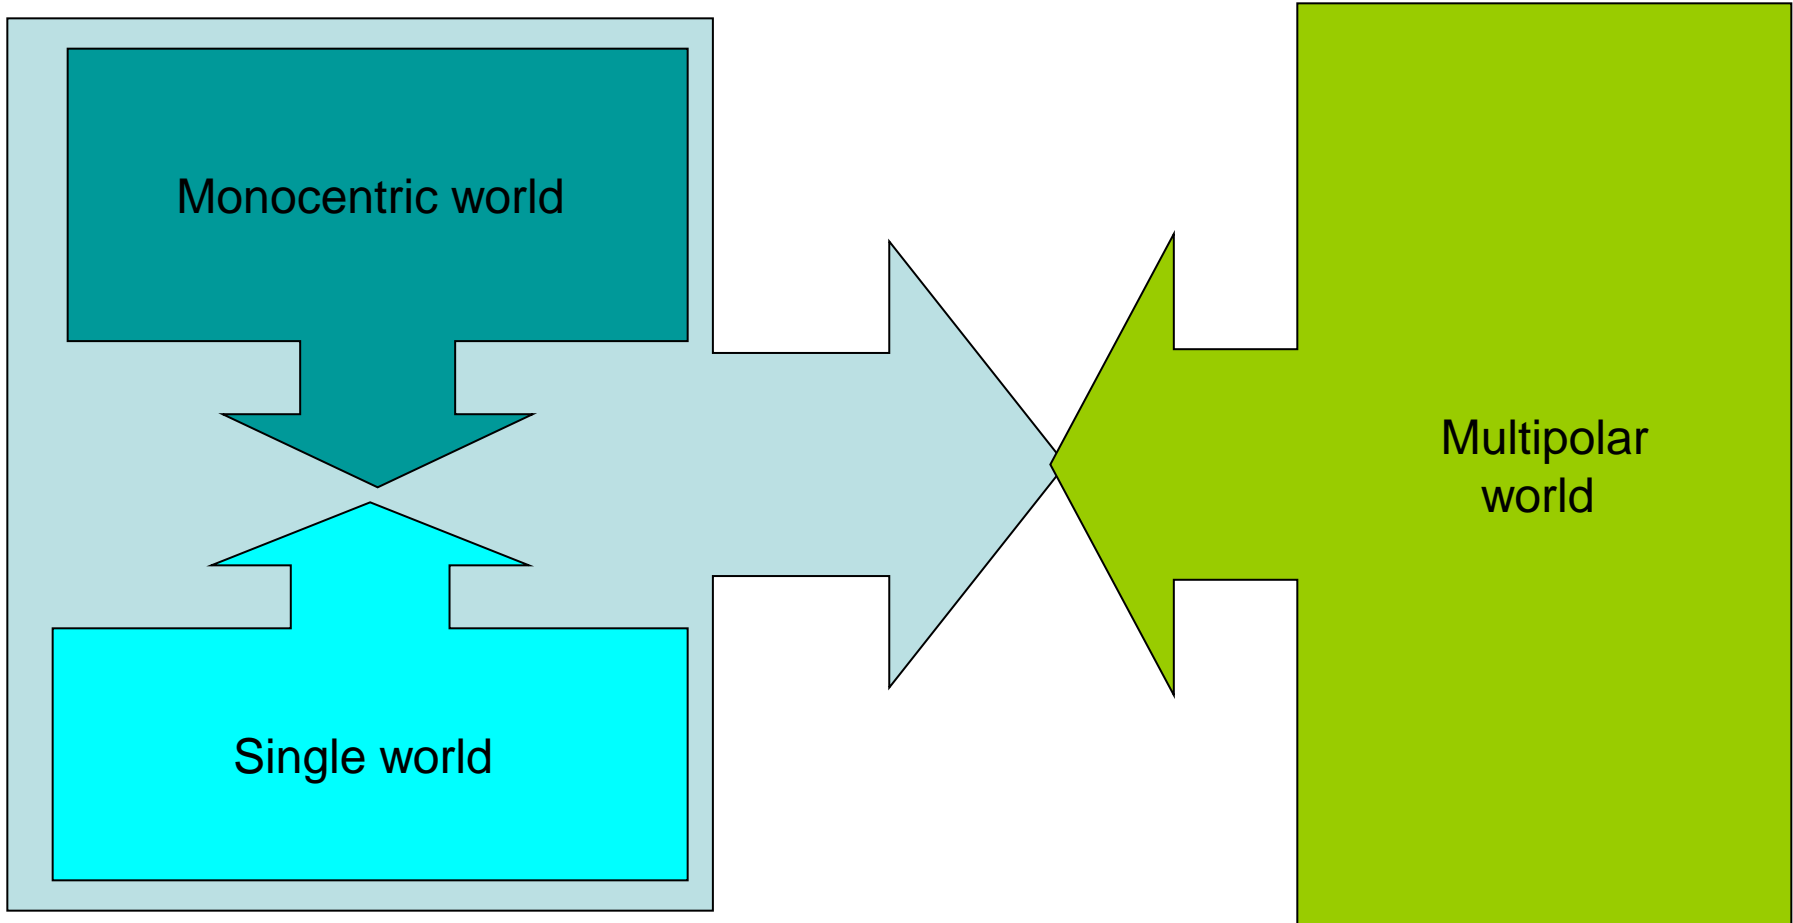

Contradiction between the «rich» developing countries (mainly owners of more part of the world's natural resources) and «rich» industrial developed.

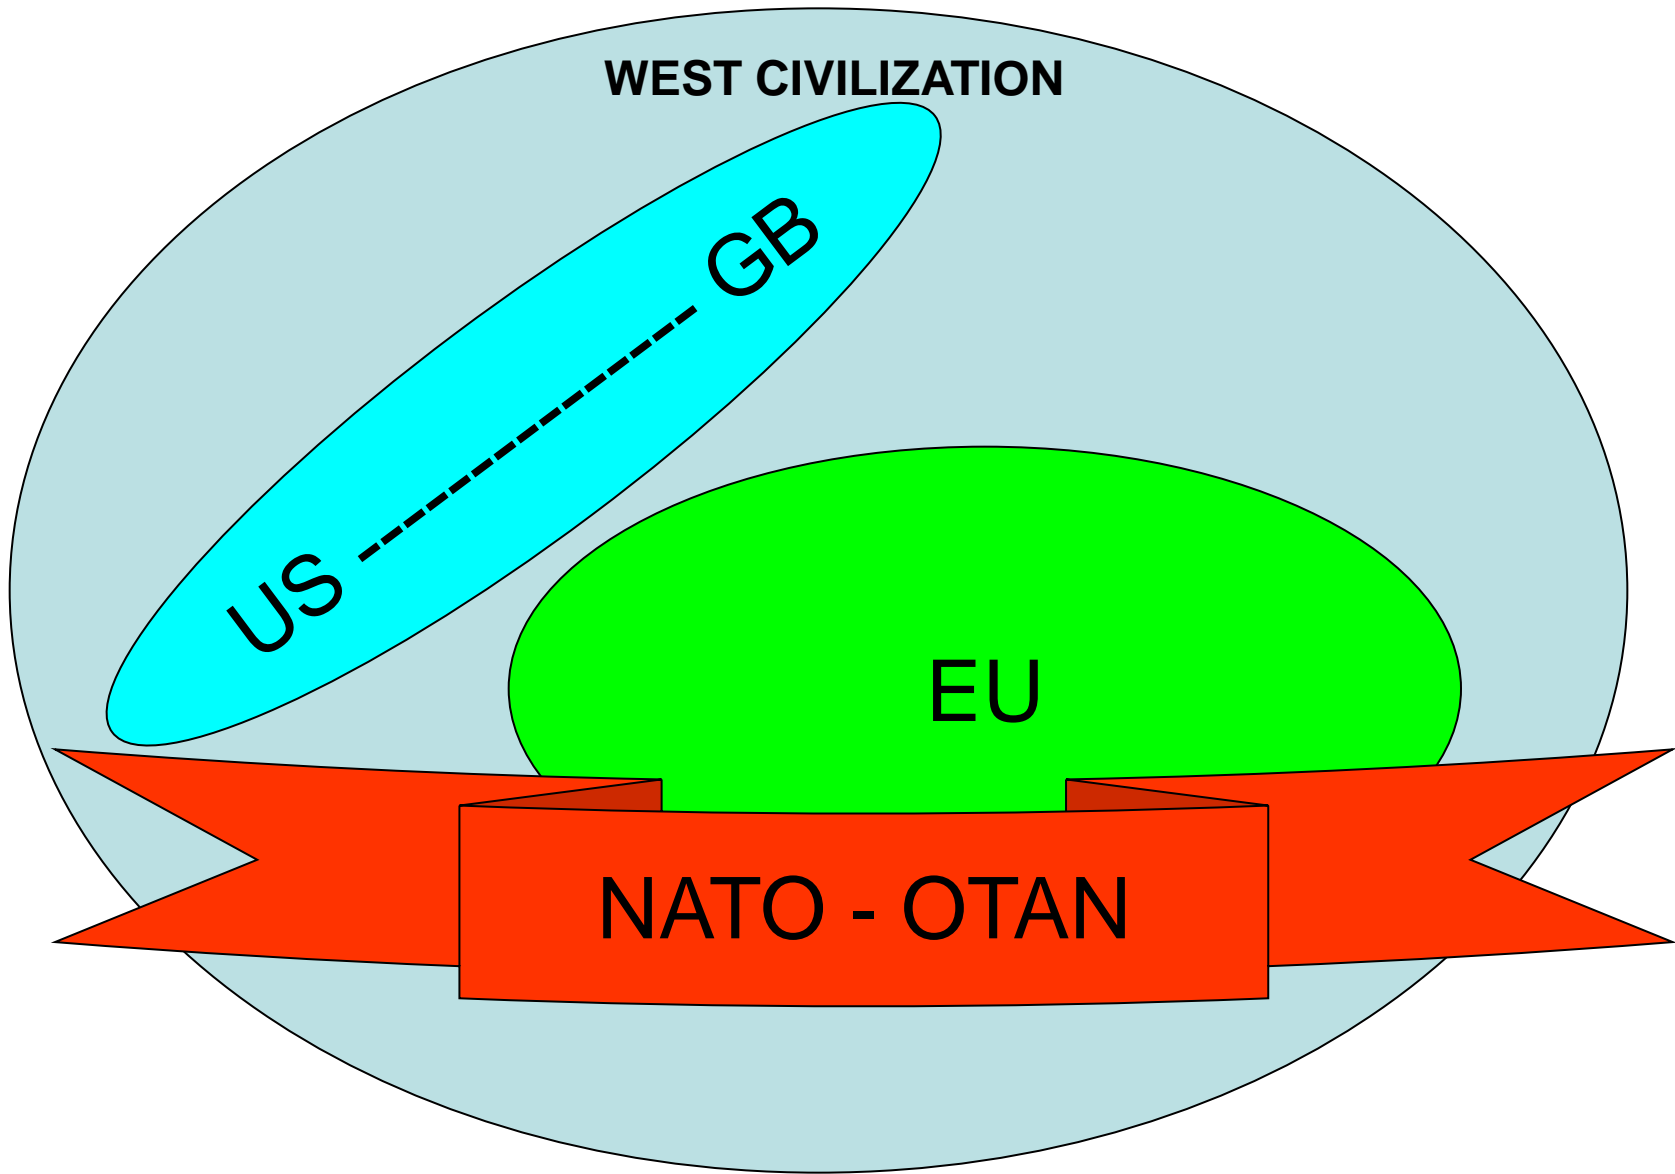

The contradiction between the national and transnational elites

The contradiction between the volume of the world «financial bubble» and the scale of the real sector of the world economy

The contradiction between the carnality of the «free market», generating the power of money and spiritual bases of the existence of different civilizations, forming the civilized differences giving rise to power of ideas
