

# Commercial Janitorial Services

Offering our clients a different level of cleaning

Industries we serve:

Office • Building • Schools • Day Care • Restaurant  
Retail Stores • Houses of Worship • Service Centers

**Our Staff** is our number one asset. We take the hiring process seriously to ensure your businesses safety and security. All candidates must have a min. of 10 years experience in professional janitorial cleaning to even qualify for an interview. Then each candidate must undergo a comprehensive background check and drug screening process that we offer to each of our clients upon request. Finally each team member must attend routine re-training & testing to ensure day to day consistency and quality.

**Our Process** is custom tailored to each client. Since we use advanced CRM and CMMS systems we are able to track our teams in realtime with accurate GPS and time stamping. We provide all workers with up to the minute job updates and inventory status reports. We collect relevant information that is passed along to your team so you can view our performance with real data.

**Our Products** are proven to be just as effective in sanitizing and deodorizing as traditional chemicals. Our complete line of Enzyme based solutions and freshly laundered microfiber mops & towels provide our teams with the tools they need to ensure your satisfaction. Along with our triple HEPA filtered backpack vacuums we offer cleaning that is safe for those with chemical sensitivities and allergies.

Emerald City Cleaning's commercial division is built from our extensive knowledge and success in residential cleaning. With national industry accreditation and certification, our commercial division is committed to the rigorous attention to detail that our residential customers demand. We are happy to provide your firm or business with a free comprehensive bid for your routine cleaning service.
