KAY ASPIN

Quality and good breed type could be found in most classes, more so in the stronger classes. The main winners scored very well in breed type quality confirmation and movement and were a pleasure to go over. On the minor side we were concerned by the very light eyes on view in some otherwise very good exhibits, there was quite a number of inverted canines, breeders need to address these points and we are sure with some care and thought, will get much better in these areas in the near future.

Once again our sincere thanks to all concerned, the show was well organised and the exhibitors were very nice indeed and were such good sports to each other.
