

# IMPORTANT NOTICE

## ABOUT THE ELECT HOSPITAL NETWORK

Fedhealth introduced the Elect network options for 2019 to allow members who don't foresee undergoing any planned hospital procedures, the opportunity to save a significant 25% on their monthly contributions. These options are priced based on special discounted tariffs negotiated with the specific hospitals on the network for these options. Because it is a limited list of hospitals, members understand that by selecting this option, they need to pay a fixed excess of R11 500 on hospital admissions, barring emergencies, at any private hospital of their choice (should they prefer to not use Elect hospitals, of course).

We regret to inform you that we could not come to an acceptable pricing agreement with some of the hospitals on the original list that would allow us to pass the 25% contribution discount on to our members. The following three hospitals in the Western Cape will therefore no longer be on the network, with immediate effect:

Mediclinic Cape Gate  
Mediclinic Stellenbosch  
Mediclinic Durbanville

We do apologise for any inconvenience caused by this announcement, but please note that **any member who joined these options prior to 1 February 2019, will not incur any hospital co-payment when making use of these three hospitals for the whole of 2019.**
