

Unleash your screen saver with ScreenSaverGallery

In order to follow *Unleashing Screensaver* exhibition, you need to install simple computer programme, that will take care of the rest - ScreenSaverGallery. ScreenSaverGallery is a virtual gallery in computer screensavers. It is installed as a programme into your computer. Once installed, ScreenSaverGallery will automatically update your computer screen saver to the new exhibition content every time new show is on. Any time you stop working on your computer, the exhibition begins in this specific context of your screen saver.

Please note that some of the works may contain sound. **Make sure you keep the sound down or provide headphones if installing ScreenSaverGallery in a library or public computer room.**
