

Brain Function and Brain Structure of Human Memory

Category

Memory

Enrollment Closing Date

Sep 30, 2020

Description

We are looking for Veterans and non-Veterans with or without memory problems to participate in memory research. The experiment will be conducted in a Magnetic Resonance Imaging (MRI) scanner on the UCSD campus in La Jolla. While in the scanner you will take computer-administered tests of memory and cognition where you will be asked to remember facts or short sentences. You will also be asked to take computer tests outside of the scanner.

Requirements

Right-handed Veterans 65 or older with or without memory problems who are able to complete behavioral tests and MRI scans, who are not claustrophobic, and who have no major psychiatric or neurological illness or dementia.

Benefits

Individuals who qualify and complete the study will be compensated up to \$290 for their participation and receive a picture of their brain. We will gain scientifically and clinically relevant information from the study results.
