

Million Veterans Program: A Partnership with Veterans

Category

Other

Enrollment Closing Date

None

Description

The Million Veteran Program (MVP) is a nationwide VA research program that will help us better understand how genes affect Veterans' health and illness. The ultimate goal of the program is to transform health care for many generations to come. Enrollment is currently open to Veterans registered in VA healthcare.

Requirements

Participants: 1) Complete a one-time study visit (approx. 20 minutes in length) to provide a blood sample for genetic analysis 2) Fill out health surveys 3) Agree to allow ongoing access to their medical records and 4) Agree to future contact.

Benefits

By participating in MVP, Veterans will help contribute to the knowledge base that may result in developing personalized treatments for military-related illnesses as well as more common illnesses, like diabetes and heart disease.
