

Single-Visit fMRI Study

Category

Mental Health

Enrollment Closing Date

Jan 1, 2022

Description

This study aims to provide a better understanding of the clinical risks facing trauma-exposed Veterans, and assist in treatments aimed at preventing the development of depression and/or co-occurring substance abuse. Participants will be asked to complete one visit. During this visit, they will undergo an MRI brain scan while completing a computer game, do a brief clinical interview, and fill out questionnaires. Compensation for participation is \$150.00.

Requirements

To participate in this study, you must be an OIF/OEF/OND Veteran and be safe to receive an MRI scan (i.e. have no metal in your body). Call the number below for more information.

Benefits

Your participation may help researchers better understand clinical risks in the profiles of trauma-exposed Veterans and develop treatments targeted at preventing depression and substance use in this population.
