

## **Traumatic Brain Injury in Parkinson's Disease: Impact on Cognition and Brain Structure**

**Category**

Parkinson's Disease

**Enrollment Closing Date****Description**

Dr. Dawn Schiehser is conducting research to learn about the impact of Traumatic Brain Injury (TBI) on cognition and brain structure in people with and without Parkinson's disease (PD). We are looking for individuals diagnosed with Parkinson's disease and/or mild to moderate traumatic brain injury, who are willing to undergo neuropsychological testing and an MRI scan.

**Requirements**

- \*Over 40 years of age
- \*Neurological diagnosis of PD, TBI or both
- \*No other neurological conditions (e.g., stroke)

**Benefits**

- \*You may earn up to \$150 for your participation
