Lodging can be found within 40 minutes of the range in Rancho Cordova or in Folsom, CA.

Contact: Terry Cross

Email: Terry@1milrt.com

Phone: 318-528-8834

Course Description

Points of Instruction will be geared toward Precision Rifle Competition shooting. Many of the skill sets will also be relevant to field shooting, Law Enforcement, and hunting. This course combines our **1MilRt Intro to Precision Rifle** curriculum and our **1MilRt Intermediate Precision Rifle** courses into 5 full days of dynamic precision rifle training.

Course curriculum is comprehensive and we will pick up the tempo and pace as the week progresses. Individual skill assessments are made at the beginning and end of this course. Continuous feedback and data is given to the student so that you have something tangible to document your progress.

A combination of lecture/discussion and range time is balanced to insure that each student builds to and meets or exceeds performance goals set for this class level. Each skill set is built upon fundamentals logically layered through each stage of this 5 day course. Ultimately, a full spectrum of the use of your precision rifle from 10 yards to 1000 yards will be covered.

**CONTINUED ON PAGE 2

Topics and Skillsets Covered

- Safe and Efficient Rifle Handling
- Fundamentals of marksmanship
- Gather solid data for your rifle and caliber out 1000yards
- Understanding of ballistics
- Traditional shooting positions
- Rapid rifle deployment and setup
- Hold overs and hold under
- Use of ballistic calculators (Kestrels with AB)
- Transitioning from different shooting positions
- Time management during a course of fire
- Moving Target Engagement
- Multiple Target Engagement
- Shooting off various barricades and props
- Improvised shooting positions
- Shooting from tri-pods
- Discussion and use of today's most popular gear for Precision Rifle Competition
- Mental mindset for competition shooting
- *Items of class interest

Minimum Equipment Requirements

- 500 rounds of match grade ammo
- 22 to 30cal with a max velocity of 3200fps
- Rifle must shoot 1MOA or better @ 100yds
- Optic with external adjustable turrets and MIL or MOA based reticle
- Bipod and rear support
- Multi-use sling
- Ballistic data for your rifle & ammo. If you do not have this, we will build this data profile.
- Note taking gear, data book or note book.
- Tools to run your rifle and optic
- Ear and eye protection is required
- Pack to carry all your gear in.
- Water and nutrition for the day.

I ensure a professional and hands on environment. Emphasis is placed on continuous communication between the instructor and student. Each student will be treated with respect as allowed within our ability to offer a safe training environment for all parties.

Favorable student to instructor ratios will be maintained. Depending on class size, 1MilRt has an extremely capable Cadre to bring on line as needed.

My goal is to improve your skills by challenging you and pushing you away from your comfort zone. There are many variables in every shooting scenario that you are not in control of. We will put you in more control so that you can succeed.
