

BATH PRODUCTS CLEANING & CARE

The all-plastic exterior of your new DUO Form bath product is made of rugged ABS polymers, so taking care of your new bath product's surface is a breeze. With proper care and attention, it can retain its "brand new" look for a long time by using the recommended cleaning products according to the manufacturers' instructions.

NORMAL CLEANING:

The following commercial cleaning products are readily available and are quite safe when properly used:

DUO Plastic Cleaner for Bath & Kitchen (available online at www.duoformplastics.com/store/), *Fantastik®*, *Ivory®* soap (liquid or flake) in a water solution, *Scrubbing Bubbles®*, *Pine Sol®*, *Formula 409®*, *Windex®*, *Simple Green®*, and *Spic and Span®*.

HEAVY-DUTY CLEANING:

The following commercial cleaners are recommended:

OOPS!®, *Soft Scrub®*, *Turtle Wax®*, *Turtle Wax® Bug & Tar and Tree Sap Remover*

After cleaning, all surfaces should be rinsed with clean water.

CAUTION: Do not use any cleaners containing citrus oils as this could cause severe damage to your unit. Cleaners containing acetone or any products that contain esters, ethers, ketones, aromatic and chlorinated hydrocarbons, and isopropanol in concentrations greater than 25% should also be avoided as use of any of these materials could damage the surface of your enclosure.
