

# HUNT-R

Your productivity booster for industrial machinery!

Take your industry to the peak of productivity.  
Hunt-R Suite makes it easy without sacrificing profitability.

## Product description

Hunt-R is a state-of-the-art Internet of Things web-based solution that allows industry managers to monitor the actual productivity of their productive assets and make informed decisions about improving equipment availability times to reduce energy bills.

Developed by

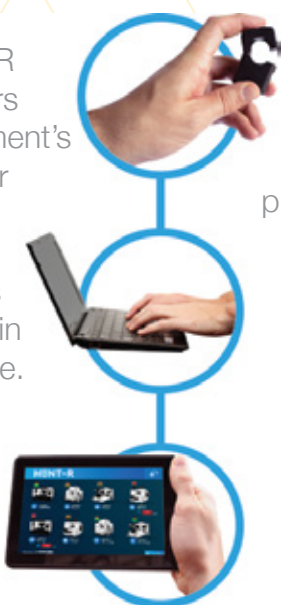

**LANTERN**<sup>®</sup>  
TECHNOLOGIES

- The Hunt-R solution easily adapts to any type of industrial machine and wirelessly monitors real-time usage and energy consumption.
- Information is uploaded to Hunt-R's cloud-based servers and is available for analysis immediately.
- Easily connect any production equipment anywhere! In just minutes.
- Sign in online to Hunt-R's web suite and watch your machines, productive areas or company's productivity levels live!

## Easy installation in 3 steps

- 1 Plug the Hunt-R wireless sensors into the equipment's electrical power box.
- 2 Machine states are configured in your online suite.
- 3 Access your account online and get your machines' performance.

## Main Functions

- Monitor your equipment in real time with a modern, fully visual and mobile-friendly interface.
- Characterize machine working states.
- Query last periods, last shifts and compare machine performance via the dashboard.
- Customize breakdown or idle time alerts.
- Drill down root cause analysis by company, area, machine and periods using Hunt-R analytics tools.
- Four levels of analysis: Live, Last Shifts, Last Production Records and Overall Company Performance over selected periods of time.
- Automatically connect your production and administrative software systems directly to Hunt-R's platform for a fully integrated, end-to-end experience.
- Optional additional sensor inputs for monitoring additional production activities and variables.

## Benefits

Increase overall company productivity.

Prevent wasteful idle times.

Reduce energy consumption via real cause analysis of production processes.

Increase assets availability. ZERO down payments. Just pay a convenient monthly fee for access. All devices, gateways and onsite installation are included in the contract.

No minimum quantities required.

Connect from anywhere at any time and from any type of device.
