2 Panel Sliding Door Configuration Options

CUSTOM PIVOT DOOR, 3-PANEL STACKER DOOR, 2-PANEL SLIDING DOOR

Please run through the steps below and ensure that accurate measurements are provided

- 1) Check that the walls and the base of the shower are plumb and level. The doors, however, are adjustable, meaning slight irregularities will cause no problem during installation.
- 2) Mark on the shower base where the front of the shower door and return is to sit.
- 3) Provide the necessary shower door dimensions by measuring the shower base you have previously marked.
- 4) Pivot fixed door (door can be turned upside down) suitable for Left or Right Hand Fixed
- 5) For the stacker sliding door, specify dimensions as indicated on diagrams above door width, and return width if required (dimensions to the outside of the shower door frame). Also fixing must be specified as per configuration diagram.
