Title: Operating Cameras
Overview/Annotation: Students will learn the ins and outs of how to operate cameras.

Primary Learning Objective(s): will learn how to work certain camera functions including quality levels, lighting, and white balance.

Total Duration: [Insert duration]
Materials and Resources: Three camera images
Technology Resources Needed: Cameras and projector
Background/Preparation: Knowledge of how to operate camera functions.

Procedures/Activities

1. Bring cameras to the school and demonstrate how the cameras work.
2. Instruct the students on the basic operations of each camera. These include the zoom, iris, focus, white balance, and ND filter functions.
3. Showcase the techniques of framing shot. Wide, medium, and tight shots.
4. Interactive exercise where the students use the techniques and learn how to use the cameras. Take them outside or into a large section of the school and allow them to capture images and footage.

Attachments:
Three Images
1. News camera for opening introduction.
2. Image that shows the white balance button and how to use it.
3. Image of a camera lens pointing out the zoom, focus, and iris functions.
