

SB150 Young Astronomers

Local students explore astronomy and make Galileoscopes, then use a global network of research-grade telescopes to capture and process celestial images.

- Launched January 2015 at Martin Luther King Jr. Day Celebration at Century Center.
- Inaugural team of students have imaged magnificent star clusters, nebulae, galaxies, and planets!
- Students meet through November 2015. Images will be displayed online.
- Ensuing groups of Skynet Junior Scholars—the parent program of SB150YA—may organize in South Bend beyond SB150.
- See www.southbendastro.org.
