PLEASE NOTE: When ordering Stainless Steel lines, please place an "S" in front of the part number.

All lines come completely preformed with correct fittings on the ends and spring wrap identical to the factory original lines. We are always scanning brake, fuel and transmission lines. If you do not see your application, call for an updated listing. For bending your own lines, see the straight length section. All of our preformed lines are manufactured with computer precision on our state-of-the-art CNC tube benders. With our exclusive computer controlled laser scanner all lines are reproduced with uncompromising accuracy. When you order Inline Tubes, they ship out within 24 hours and are at your doorstep in a matter of a few days.
