

# Sierra Club Atlantic Chapter Youtube Channel with Sierra Club Long Island Group youtube Coastal Resiliency Series

1. Final METHOPRENE AND COASTAL RESILIENCY 4/23/2019 Published **252 views** as of May 30, 2019 <https://www.youtube.com/watch?v=8sRnCjaF3cU> Featuring Fred Thiele, Professor Matthias and Kevin McAllister
2. Terrapin Project: Interviews with Professor Burke and DEC Kelly Hamilton June 2018 **206 views**  
<https://www.youtube.com/watch?v=Wpfh1FDPYpc&feature=youtu.be> Uploaded on Sep 24, 2018
3. Alewife Migration - The Alewife is a fish that moves from salt water to fresh water to spawn. They then return back to salt water. These fish are an indicator of our fragile ecosystem within our local environment. Fish migration is correlated to Coastal Resiliency. <https://www.youtube.com/watch?v=ezWmWnUimbl> Published on Mar 16, 2018 **209 views**
4. World Fish Migration Day Published on May 11, 2018 "The decline of diadromous fish (striped bass, Atlantic sturgeon, American shad, Alewife and Blueback Herring, American Eel, Brook Trout) has a major impact on the health of our coastal ecosystem, as these fish play a vital role in transferring ocean energy into estuarine, freshwater and upland habitats, and provide indispensable forage for countless other species. It is no exaggeration to say that they help to drive Long Island's entire coastal food web. Rebuilding their populations across the region is a critical component in restoring the hearth of our estuaries."
