Stream Network

Stream network is a social networking video platform, developed specifically for streamers and content creators.

Technical white paper

Contents

Vision

Chad Hurley, Steve Chen and Jawed Karim, created the future of video. All of them are the first employees of PayPal (a company specializing in building online payment website). The domain "YouTube.com" was launched on February 14, 2005, and the site was developed a few months later.

In the summer of 2006, YouTube was one of the fastest growing Web sites in the Web community, and ranked fifth on the most popular sites on Alexa, with even faster growth than MySpace. According to the survey on July 16, 2006, 100 million video clips were watched daily on YouTube, plus 65,000 new videos were uploaded each day. The site has an average of 20 million hits a month, according to Nielsen / NetRatings, of which about 44% are females, 56% males, and 12 to 28 are predominantly male. The advantage of YouTube in the online video market is the fact. According to Hitwise.com, YouTube owns 64 percent of the online video market in the UK.

After evaluating the potential of technology and omissions in the video platform. Our team has concluded that a solution lies in the video platform, or what we call StreamNetwork. This platform is a unique network, accessible and distributed locally, both at home and abroad to enhance the value users can reach at a reasonable cost.

Motivation

Blockchain and cryptocurrency news have become more familiar to people, but it's still difficult to get into these fancy things, even for software developers. Most blockchain projects focus on the distribution factors and Initial Coin Offering (sale). Coin holders see it as a way of investing, speculating for profit. And almost blockchain does not bring live value to the user.

Despite their effort on the distribution dream, settings into the application, We have noticed the fact that even the coin of great value on the market does not yet have practical application.

Some popular blockchain projects Tether, Ripple or Cybermiles...They're effort to improve blockchain, but that's all.

Still, the future of blockchain brought about must still be applied to reality, bringing value to man

Technology Platform

Overview Blockchain

StreamNetwork uses Waves as the primary blockchain platform. The Waves system is stable from the time of use, fast, stable, secure, low cost transactions. We replaced Ethereum with Wavesplatform when Ethereum's network continuously pending deals.

The future of video

Scale your video to audiences of any size, worldwide. Over 2 million live video events streamed every month. Drive marketing success with the world's most engaging medium. Professional one-to-one support, on tap.

Professional streaming made simple

StreamNetwork builds an online video network that combines the best tools to create your own content.

Live broadcast, record, publish, manage, and measure all from a single integrated platform. Produce live streaming and on-demand video that can be embedded on a website, hosted on an included channel page or shared over a social network for added engagement.

Whether you're streaming to social or producing an event streamed around the world, our hardware and software are designed to make you look like a pro.

Timeline

Idea Conception

Q3 - 2017

STRN contract creation.
Airdrop Distribution.
Website launch.
Whitepaper V 1.0.
First exchange listing.

Q1 - 2018

CoinMarketCap listing.
More exchange listings.
Community voting bounties.

Q2 - 2018

STRN Wallet Launch.
New product / service planning.

Q3 - 2018

STRN integration system lauch.
Planned listing on either Binance,
Bittrex or Poloniex.

Q4 - 2018

STRN Wallet improvements.
STRN system improvements.
Creating a new roadmap version.

Q1 - 2019

Project details

Summary

STRN is a multi-platform application token, Unified digital services by providing a cryptocurrency to be used on a wide range of applications of the StreamNetwork system, rather than an ICO token built for a single application purpose.

Airdropped All

Why STRN is NOT running an ICO? ICO pre-sales favor the Whales. Whales use high transaction fees to secure tokens. Pre-sale investors flash dump to secure quick profits

Distribution

Token: Stream Network

Symbol: STRN

Decimal: 8

Total supply: 100 000 000 STRN.

- 70 000 000 STRN for Airdrop.
- 10 000 000 STRN for development team.
- 10 000 000 STRN for marketing and business development.
- 5 000 000 STRN for negotiate with the global market.
