Rodear Branding - 5 Minute Time Limit

The roping stock will be run in with grown cows.

Objective is to head and heel two consecutively numbered calves from the rodear IN ORDER. They must cross the rodear line before they are heeled. Once they are heeled and laid down they can be branded. Time stops when iron is removed from the last calf. Roping a cow will result in a no time. No deduction for roping the wrong calf other than the time it takes to remove your rope. 5 minute time limit. One additional rider may join the team as a rodear holder, but may not rope or influence the run other than to help hold the heard.
